

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

The ventilation system seems to be very satisfactory. Your committee believe that a considerable saving could be made by centralizing the heating plant, thereby making the heating and lighting of the entire institution more economical and effective. This change would necessitate removing the two boilers now in separate buildings and placing them in central heating and power building, which will need to be enlarged to receive them, also the building of about 700 feet of tunnel to connect with the part already built, to contain water and heating pipes and electric light wires. We would also recommend that said tunnel be built through centre of basements of laundry and proposed central dining hall, thereby saving much excavation, also angles in pipes. Your

committee find that the Upper Peninsula Asylum has not sufficient capacity to accommodate the insane resident in the upper peninsula and many such patients (155) are now being cared for in the asylum at Traverse City, which is now overcrowded; and the State Board of Control having authorized removal of such U. P. patients, we would therefore advise a sufficient appropriation to build two additional cottages and a wing to the infirmary, enlarge the heating and power plant as heretofore suggested, and, in case more stock is purchased, a sufficient addition to the barn to shelter and care for such stock. Your committee would also approve the cottage system for care of insane, as adopted in this institution, believing that the increased cost of this system over the old—"Kirkbride"—system is fully justified by the better results obtained. We believe that the location and sewer arrangements are, from a sanitary point of view, all that could be desired, but we do not think the location and character of the soil will justify expensive agricultural experiments or the employment of very much labor on the asylum farm beyond what the inmates shall be able to perform. Your committee looked through the books and accounts of the institution and found that a very large percentage of the supplies were purchased of Michigan dealers and jobbers, and all recent purchases seem to have been carefully made and on economical business principles, but that cannot be truthfully said of some purchases made at an early date in the existence of the asylum. When the capacity of the asylum is increased and the number of patients cared for increases it will probably be necessary to purchase two work teams, one bull, ten cows, two farm wagons, one spring wagon, two pairs of heavy bobs, three sets of harness, blankets, robes, etc., and in opinion of your committee an appropriation of \$1,275.00 should be sufficient to make such purchases. Your committee would recommend that in case an appropriation is made for the purpose of erecting additional buildings, that the board of trustees be required to confine all expenses of erecting such buildings within the appropriations therefor, and not render special bills for details of construction, such as architects' services, etc., outside of and independent of the estimates and appropriations for such buildings, but all such bills should be rendered to the Board of State Auditors and by them charged against such appropriation. An itemized abstract of current expenses for eight months is attached hereto, which we consider is a very favorable showing for the management under the present rather unfavorable conditions. All of which is respectfully submitted.

On demand of Mr. Gustin,

The resolutions were read at length and spread at large on the Journal, as follows:

At a meeting of the Alpena Business Men's Association, held on Tuesday, March 9, 1897, resolutions were unanimously passed protesting against the passage of two certain bills, now pending in the State legislature, which, if crystalized into law, would ruin the fishing interests in this State, bankrupt those now engaged in the business, and impose special hardship upon the people of Alpena and vicinity.

*Resolved* (1.) That the passage of two certain bills, now pending in the legislature, numbered respectively 658 and 659, one of which is entitled "A bill to require all persons fishing with nets or similar appliances in the waters of this State to obtain a license therefor, and to provide a penalty for using such nets or similar appliances without such license;" and the other entitled "A bill to regulate the catching of fish in the waters of this State, by the use of pound or trap nets, seines and other apparatus," would practically destroy and thereby seriously damage the business interests of Alpena;

(2) That the passage of the bill imposing the license referred to, would be absolutely prohibitive, as if all kinds of fishing were a crime.

(3) That the passage of the bill to regulate fishing by the use of pound or trap nets, etc., would render it practically impossible to catch fish without violating the law.

(4) That, if the legislature would pass a law, containing one short sentence, absolutely prohibiting the catching of fish in any form, the entire grounds of said bills would be covered and the purpose of their promoters would be accomplished.

Secretary of Alpena Business Men's Association.

No. 1226. By Mr. Kelly: Proclamation of the Governor relative to salary of Attorney General.

On demand of Mr. Kelly,

The proclamation was read at length and spread at large on the Journal, as follows:

COMMONWEALTH OF MICHIGAN,  
EXECUTIVE OFFICE,  
Lansing, March 10, 1897.

To the voters of Michigan:

The legislature of this State, by a practically unanimous vote, and without party division, has voted to amend the constitution of this State, so that hereafter the Attorney General shall reside at the capitol during his official term and give all of his time and strength to the duties of his office.

In return for this work they have said that he shall receive three thousand five hundred dollars (\$3,500) a year, instead of eight hundred, which was put in the constitution nearly 50 years ago, with the understanding that as there was then little for the Attorney General to do, he could give nearly all of his time to his own business.

I approve of this amendment, and now that it has been submitted to you for the purpose of determining whether you will ratify and approve that which your representatives have already done, I desire to address you in advocacy of this amendment, by using the strongest language that I can command.

As your Governor, chosen by you to execute the laws, I am anxious to do so to the best of my ability. But on a moment's reflection, you will see that it is absolutely necessary, if any work is to be done which has for its object the defense of your rights and the protection of your interests, that the time of the Attorney General must be taken up. His place is here at the capitol. But it is wrong to ask that this service be performed, unless some provision is made for his pay. Unless you, as voters of this State, are willing to ratify this amendment, then one of three things must follow: Either that no attempt shall be made to protect your interests, or that the Attorney General must work practically for nothing, or the custom be continued of hiring outside attorneys and paying them liberally for doing the work which you elect the Attorney General to perform.

The simple fact is, as shown by the official records, you have paid out for this service, on an average, much more per year than the amount named in this amendment. What the State of Michigan has lost by reason of its refusal to pay a decent salary to a good attorney, no man can tell; in my judgment it would run into the millions. The proposed amendment would cost the average taxpayer so much less than a cent a year that it would be difficult to compute.

In the interest then, of good government, in the interest of economy, and as one determined, so far as I can, to protect and defend your rights, I ask you to vote "Yes" on the proposition to amend the constitution as submitted to you.

Very respectfully,

H. S. Pingree,

Governor.

Referred to the committee on Judiciary.

*Resolved*, That the board enter a unanimous protest against the bill now before the House of Representatives, having passed the Senate,

repealing the tax on mortgages. We regard the proposed act as class legislation of the most obnoxious character, relieving as it does from their just proportion of the public burdens men who of all are the most capable of paying.

We request our Representatives at Lansing to oppose the measure, having no doubt that in so doing they will voice the overwhelming sentiment of the people of this county.

Milo W. Davis,

Referred to the committee on General Taxation.

No. 1233. By Mr. Gustin: Resolutions of the Chase Benjamin Gun Club relative to proposed amendments to the game laws.

On demand of Mr. Gustin,

The resolutions were read at length and spread at large on the Journal, as follows:

At a regular meeting of the Chase Benjamin Gun Club of Alpena, Michigan, the following resolutions were unanimously adopted:

WHEREAS, A bill has been introduced in the House of Representatives to repeal the act which prevents the sale of partridge and quail in the State of Michigan, and permit the sale thereof, being House bill No. 160, and

WHEREAS, Such a law would result in the extermination of partridge and quail in this State, working extreme hardship upon the actual settlers by depriving them of the use of such game for food, and would also be very detrimental to legitimate sportsmen; now, therefore

*Resolved*, That we hereby enter our most earnest protest against the passage of such a law, and commend that feature of the present game law, and respectfully ask that this provision be retained in the game law of this State, as we have seen its beneficial results in propagating these species of game, and protecting them from slaughter by pot-hunters; further

*Resolved*, That a copy of these resolutions be forwarded to our Representatives at Lansing, and we request that they be spread upon the Legislative Journal.

Dated Alpena, Michigan, February 3, 1897.

By the committee on Normal School:

The committee on Normal School beg leave to report that they have visited the Normal School at Ypsilanti and devoted much time and attention to a careful examination of the management and conduct of the institution and its needs and requirements for the future.

We believe the citizens of the State have reason to feel proud of the Ypsilanti Normal, and the splendid work that is being accomplished by it for the educational interests of the State through its able professors

and other teachers, under the wise guidance of the very efficient State Board of Education.

The system of education and courses of study adopted are fully equal to those of any similar institution of which your committee has knowledge. The Ypsilanti Normal ranks among the very first of similar institutions of the country.

Prof. R. G. Boone, an educator of high repute, is the acting superintendent of the institution, and has the aid of a corps of able teachers, who have been selected with care from among the best educators of this and other states.

The students attending this institution fully appreciate the value of an education and its influences upon character, and a large majority of them are seeking through their own individual efforts to prepare themselves for their chosen calling, that of teaching in the schools of the State. As a result they need no urging, but push forward with commendable zeal toward the goal of their several ambitions.

The new training school will, when ready for occupancy, somewhat relieve the heretofore crowded condition of some of the departments, but more room is greatly needed at this time for additional library facilities, and also to relieve the over-crowded condition of the reading-room.

The gymnasium attached to the Normal School is a source of great benefit to the students, and its effects upon them are plainly manifest to the visitor. Instead of the sallow complexions and feeble physiques so unfortunately common to students of most educational institutions, the students at the State Normal are bright-eyed, rosy-cheeked, and every one the picture of health, which fact is illustrative of the benefits derived from the gymnasium.

The general appropriation asked for by the institution is, in the judgment of your committee, both necessary and conservative. The special appropriation desired for a heating plant, additional library facilities and fire protection are, in the judgment of your committee, absolutely necessary, and will not only greatly add to the convenience of the institution, but will prove sources of economy to the State.

During the year of 1896 the State Normal paid to private companies for lighting the sum of \$665, and the lighting of the new buildings now ready for occupancy will add considerably to that amount another year. An appropriation of \$2,500 is asked for the purchase of dynamos sufficient to light all the buildings of the institution. Such can be furnished with power from the boilers now in use for other purposes, and will require no expenditures for labor in operating, as the engineer now in charge of the boilers can also attend to the operating of the lighting plant. Your committee believe, therefore, that the appropriation must necessarily result in economy to the State.

No. 1293. By Mr. Mayer: Remonstrance of 197 farmers and taxpayers of the township of Aurelius, Ingham county, against the passage of House bill 958, or any similar bill, to amend the charter of the city of Lansing, in so far as it provides for any increase of the number of supervisors from said city upon the board of supervisors of the county of Ingham.

On demand of Mr. Mayer,

The remonstrance was read at length and spread at large on the Journal, as follows:

Ingham County, Michigan, Thursday, Feb. 25, 1897.

To the Senate and House of Representatives, Lansing, Mich.:

Your petitioners, taxpayers of Ingham county, are informed and believe the certain contemplated amendments to the charter of the city of Lansing are unjust and detrimental to the interests of said county, and we hereby most earnestly and respectfully remonstrate against all legislation amending such charter in so far as it would increase the representation of said city upon the board of supervisors.

(1) It would needlessly increase the expenses of our board of supervisors. (2) Lansing does not need more supervisors for any worthy purpose. She has never been treated unfairly by the board as now constituted. For example: By equalization, she is required to pay State and county taxes on only 75 per cent of her assessed valuation, while the balance of the county as a whole is required to pay such taxes on 93 per cent of its assessed valuation; and the farming lands of the county are assessed at an average of \$34 per acre, with the personal property upon them in proportion. (3) With her seven supervisors, all working for the same interests, she already has sufficient power among our other eighteen, and a larger representation would be dangerous, allowing one corporation too much authority. (4) The argument that the populous city should have representation on the board at the same ratio of population as the more sparsely settled townships does not prevail in any part of the State, and this is the only argument we hear urged in favor of an increase of Lansing's supervisors. And, in proportion to population (including even the inmates of the Blind and Industrial Schools), she now has more supervisors than the majority of Michigan cities of her size or larger. (5) When considered as a payer of State and county tax, Lansing also fares better in our county than do the majority of cities in their respective counties. Her per cent of supervisors in the county, when compared with the per cent of such tax she pays in the county, is much greater than that of Jackson, Kalamazoo, the Bay Cities, Saginaw, Detroit, Grand Rapids, Flint, Muskegon, and many others.

All of which conditions, favorable to herself, Lansing has been able to maintain with her present force of supervisors, and she can advance no good reason for an increase. Indeed, the legislature of 1895 took from that part of the county outside of Lansing two supervisors, thereby increasing Lansing's ratio upon the board.

We therefore believe that her attempt to add even one is uncalled for and unjust, and we respectfully petition that no such undue advantage be given her.

The papers were read at length and spread at large on the Journal, as follows:

Flint, Michigan, March 16, 1897.

Hon. W. R. Bates:

Sir—I have no hesitation in saying that I think it unwise to put such a vast interest as the purchase or selection of text books for schools in the whole State into the hands of three or four men. It has been prolific of much that is questionable in some of the states of which I know, and would without doubt, sooner or later, bring the same unpleasant result here. There are too many "millions" in such a scheme to make the risk advisable, in my opinion. I sympathize with our board of education on this subject.

Yours, etc.,

Geo. H. Durand.

Hon. W. R. Bates, Lansing:

Dear Sir—On behalf of the Board of Education of this city, I request that you use your influence to defeat House bill No. 64, known as the Graham-Forsyth text book bill. It does not seem adapted to our schools, nor provide for their best interests.

If this bill is likely to pass, we desire that the city of Flint be omitted from its provisions.

No. 1332. By Mr. Wetherbee: Memorial of the Wayne County Medical Society praying for the enactment of an improved method for the registration of deaths.

On demand of Mr. Wetherbee,

The memorial was read at length and spread at large on the Journal, as follows:

Memorial from the Wayne County Medical society, praying for the enactment of an improved method for the registration of deaths and the requiring of death certificates.

WHEREAS, The Wayne County Medical Society, believes that the interests of all our citizens would be promoted by the prompt and accurate registration of all deaths in the State capitol at Lansing, and the frequent publication of such reports,

WHEREAS, The present method has been in operation during more than a quarter of a century, and falls in many important points to meet modern methods,

**WHEREAS,** It is possible to make such registration, compilation and report, accord with modern statistical science, without any additional cost to the State,

*Resolved,* That the Wayne County Medical Society respectfully urges the establishment of a modern system of registration of deaths that shall provide for the report of all deaths occurring in the State, for the prompt return of the same to a central registration office in Lansing, and for the frequent publication of results. It urges the State as a whole to do for its citizens what the larger cities do for their citizens;

*Resolved,* That the Wayne County Medical Society respectfully asks the legislature of Michigan to consider the bill introduced into the House by Mr. Wetherbee, and known as House bill No. 27 (file No. 20), providing for the immediate registration and prompt returns, compilation and publication of the deaths in Michigan, and either enact it in its present form or with such modification as shall be deemed wise, in order to better accomplish its purpose.

The amendment reported from the Senate, relating to the board of supervisors, your committee believe that it is not more than just, and that it should stand, that the representation as proposed in the bill as amended by the Senate be concurred in, because the city has 100,000 inhabitants, and pays 2-3 of the taxes, and the county has but 42,000 inhabitants, and pays but 1-3 of the taxes, and we believe that they are entitled to equal representation on the board of supervisors.

And your committee respectfully request that they may be discharged from further consideration of the bill.

P. Herrig,  
Chairman.

Report accepted and committee discharged.

James Cousins,  
Chairman.

Report accepted and committee discharged.

The question being on ordering the bill printed for the use of the committee,

The House so ordered.

By the committee on Horticulture:

The committee on Horticulture, to whom was referred  
House bill No. 405, entitled

A bill to amend Sec. 8 of an act entitled "An act to prevent the spread of contagious diseases of fruit trees," being act No. 109 of the session laws of 1895;

Respectfully report that they have had the same under consideration, and have directed me to report the same back to the House without amendment, and recommend that it do pass, and ask to be discharged from the further consideration of the subject.

Lauren F. Otis,  
Chairman.

Report accepted and committee discharged.

The bill was ordered printed, referred to the committee of the whole and placed on the general order.

By the committee on School of Mines:

The committee on School of Mines respectfully submit to the House the following report of its investigations into the conditions and needs of that institution. The feeling, so prevalent, that this school is a luxury which the State can ill afford to maintain, prompted your committee to an unusually careful inquiry concerning the whole subject. Passing over the question of the wisdom of establishing the school, which is now useless to consider, your committee has endeavored to gain such facts as would aid in forming a correct conclusion as to the policy which should be pursued under existing conditions. We are pleased to report that the buildings and equipments are far more valuable and complete than could be expected to be procured with the amount which has been appropriated for permanent improvements. A conservative inventory totals several thousand dollars in excess of the total amount appropriated for that purpose. This condition is the result of careful expenditure of funds.

and the fact that a large amount of valuable apparatus has been created by the students at the school involving only a small expenditure for raw materials. A personal examination of the vouchers on file in the office of the Auditor General proves that the board of control has been extremely careful in the matter of expenditures; nevertheless the cost of maintaining this school *seems* very high when compared with other schools of this State. We are convinced however that a more just comparison would be with other schools of like nature or with the technological departments of our University. When we make such comparison we find that the School of Mines is maintained at a cost per student that is among the least and when compared with other mining schools it is far below any other. Concerning the work of the school and the completeness of the training given, we have only to cite the fact that the graduates of the school are eagerly sought by large mining companies having need of skilled men, and we believe that almost without exception they are quickly installed in positions of trust and at generous salaries. This condition is attracting students in increasing numbers not only from Michigan, but from without the State and even from without the United States. It is therefore the opinion of this committee that the school can now safely charge a tuition fee, and we have already favorably reported a bill which provides a graduated series of charges, being smallest for Michigan students, larger for residents of the United States outside of Michigan, and largest for non-residents of the United States, but permitting the remitting of these charges for bona fide residents of Michigan who are absolutely unable to pay. Our schools should never become schools for the rich alone. If then our School of Mines is carefully and economically conducted, if it is performing the work for which it was constituted in a satisfactory manner, the question then resolves itself to the following: How much money is absolutely necessary to continue the school without impairing its usefulness? Are the taxpayers of the State able to contribute such an amount? The tendency of every school established for a specific purpose is to extend and diversify its courses of instruction beyond the limit established by the organic act. And your committee are of the opinion that the Mining School cannot escape criticism in this particular. The act establishing the school prescribes that "the course of instruction shall embrace geology, minerology, chemistry, mining and mining engineering and such other branches of practical and theoretical knowledge as will in the opinion of the board conduce to the end of enabling the student of said institution to obtain a full knowledge of the science, art and practice of mining and application of machinery thereto." A careful study of the catalogue of the school shows that instruction is given in a wide range of subjects which can hardly be justified except on the hypothesis that all knowledge in the domain of science, literature and art will conduce to the end of enabling the student to obtain a full knowledge of the science, art and practice of mining and the application of machinery thereto. How far this practice adds to the cost of maintaining the school, your committee are unable to ascertain. The committee are decidedly in favor of an economical policy in relation to the conduct of all our State institutions and under present conditions, must in general regard with disfavor appropriations for per-

manent improvements. The present assaying department at the School of Mines is a menace to the whole institution and good business policy demands that provision be made for removing it from present quarters. A moderate appropriation for an assay laboratory is therefore recommended. For current expenses this committee will favor an appropriation sufficient to maintain a school of the nature contemplated by the act establishing it, and believe in adopting a broad interpretation of that act, but are not in favor of gradually extending the courses of instruction until it shall become a school of literature, political science and art.

John Washer.

Which was adopted.

The Speaker named Messrs. Lusk and Clute as a committee to escort Mr. Stewart to the Speaker's platform.

The committee performed the duty assigned them, and Mr. Stewart, after introduction by the Speaker, addressed the House as follows:

Gentlemen—In accepting your congratulations on my nomination for the mayoralty of the city of Detroit, I am at a loss for words to rightly express my feelings.

It is an honor, and indeed a great honor to be nominated by a republican convention, and particularly so when my name had not been mentioned or canvassed in the selection of the members of the convention.

It is an honor for which any citizen might well be proud, to receive the nomination for mayor of the city of Detroit, a city rich in its historic memories, a city that within the last few years has risen from a place of humiliation in the development and beautifying of its streets, parks, boulevards and buildings, public and private, to one that vies today with the best and proudest in the land.

And to me it is a matter of pride that I can to you and my friends, here and elsewhere, say that it is an honor unsought by me, and was as much of a surprise to me as it must have been to you. And again, there is to me a sense of honor in the fact that the republicans of Detroit have by this act confided to my hands that banner of municipal reform that has been carried by His Honor Hazen S. Pingree for the last seven years through some of the most bitter political struggles that this country or generation has ever seen.

On that banner I see conspicuously inscribed "Equal rights to all, special privileges to none." I have followed that banner when in the hands of Mayor Pingree with a fidelity born of my heartfelt convictions that it was right, and that he was right in his stand for the people and their rights.

I have no new platform to present, indeed the platform of Mayor Pingree itself was not new. The principle is as old as civilization and is the only one that will bring peace and prosperity to the whole people of this country. My fondness for Mayor Pingree was not for his person, or social position, I admired and supported him for the principles for which he stood.

If the people of the city of Detroit ratify the nomination as made by the convention, and stand by me as they have stood by Mayor Pingree I will assure them that I will never betray the trust confided in me.

I concede the corporations and wealth their rights and will maintain and defend them, but I do not believe or concede that the people, and by that word I mean the common people, should be robbed or disfranchised or wronged for the benefit of any class.

Planting my feet firmly I stand and will fight or die for "Equal rights to all and special privileges to none."

Gentlemen, I will not detain you now. I ask you to accept my sincere thanks for your kindly greeting and congratulations.

Gentlemen, I thank you.

No. 1503. By Mr. Cousins: Report of a committee of the board of supervisors of Hillsdale county on the taxation of mortgages.

On demand of Mr. Cousins,

The report was read at length and spread at large on the Journal, as follows:

Gentlemen—The special committee to whom was referred the duty of drafting resolutions of remonstrance against the passage of Senate bill No. 51, beg leave to report as follows:

The board of supervisors of Hillsdale county would most respectfully request that our Representatives in the State Legislature use all hon-

orable means at their command to prevent from becoming a law the bill known as Senate bill No. 51, being "An act to provide for the assessment of property and the levy and collection of taxes thereon, with a provision incorporated in said act exempting from such assessment and tax levy all credits that are secured by lien upon real estate by mortgage or land contract which real estate is itself assessable." The reasons for such request being briefly given herein:

This committee finds after very careful examination that such provision for exemption of mortgaged property as above noted would strike from the assessable personal property of the county fully 44 per cent of the entire amount of such personal, and must of necessity add very largely to the burden of taxation upon real estate, which we feel to be exceedingly ungenerous and unjust, and further believe that time will fully reveal the folly of such legislation. We are absolutely certain that no redeeming feature can be found in the act worthy of note, and no sophistry can conceal its true intent.

Secondly, It would at once create a struggle among the money loaning class to convert all security by promissory note into mortgage securities, which would at once create an imperative demand for money to cancel such obligation, and would necessarily unsettle business to that extent that it would be a fatality to the people of the State.

Again, the large increase in mortgage registration which must surely follow this enactment would be a discouraging factor and a disturbing feature to business by creating the impression that indebtedness was increasing, and in the judgment of this board would weaken the recuperation power of an increase in values.

In short, we can see no feature in the act that has any reimbursing factor to compensate in any degree for the loss of 44 per cent of the personal property of the county, with the absolute certainty that such amount will be increased to fully 50 per cent or more as soon as the individual securities can be transferred to mortgage liens, and we believe that by such exemption, large burdens will be added to all classes that are carrying indebtedness, whether agricultural or commercial, and any speculation or proposition that the exemption of mortgage securities will result in lowering the rate of interest is indeed idle and visionary, and can hardly deceive the most ordinary intellect, who is in any degree familiar with the fixing of all rates.

#### REPORTS OF STANDING COMMITTEES.

By the committee on Asylum for Criminal Insane:

The committee on Asylum for Criminal Insane, to whom was referred House bill No. 454, entitled

A bill appropriating money for the use of the Michigan Asylum for Dangerous and Criminal Insane;

Respectfully report that they have had the same under consideration, and have directed me to report the same back to the House, with the accompanying substitute therefor, entitled

A bill appropriating money for the use of the Michigan Asylum for Dangerous and Criminal Insane;

Recommending that the substitute be concurred in, and that the substitute do pass, and ask to be discharged from the further consideration of the subject.

A. J. Peek,  
Chairman.

Report accepted and committee discharged.

The question being on concurring in the substitute reported for the bill, by the committee,

The House concurred.

The bill was then ordered referred to the committee on Ways and Means.

By the committee on Dangerous and Criminal Insane:

Your committee on Asylum for Dangerous and Criminal Insane would respectfully report that they visited this institution on February 12, and made a careful investigation thereof.

During the last two years the additional building provided for by the legislature of 1895 has been completed and at the time of our visit was nearly ready for occupancy. This building adjoins what is known as the branch across the river from the main building, and seems to have been constructed along the lines of the most approved modern construction for this class of public institutions.

There are at present two hundred and eighteen patients, one hundred and twenty-five of whom are accommodated in the main building, and ninety-three on the south side of the river at the so-called branch building.

We made a very thorough examination of both the main and branch departments, and found a thorough system maintained; indeed the management of this asylum seems to be exceptionally good.

The cost of maintaining the patients has been reduced to forty-four cents per day, and at the same time the tables are apparently well supplied, and the care given this dangerous class of patients is excellent.

The legislature of 1895 appropriated six hundred dollars for the purpose of developing a water supply on the south side of the river, but failed to provide the necessary money to purchase the land adjacent to the branch for that purpose.

Your committee recommend the appropriation of twelve hundred dollars for said land, or to be otherwise expended to procure an adequate supply of water.

We also respectfully recommend an appropriation of one thousand dollars for the erection of a laundry, one thousand six hundred and seventy-five dollars for machinery for said laundry, and for floors in the water closets, and four thousand dollars for an electric lighting plant. The management asks for five thousand dollars for this latter item, but after investigation your committee is of the opinion that four thousand dollars will be sufficient. The necessity for this item may be demonstrated by the statement that under the present system of procuring electric lighting from the city of Ionia, the cost will be about two thousand dollars per year, and if a plant be established the power can be furnished by the facilities provided in the new building, and the present engineer can act as electrical engineer without additional expense.

This makes the total appropriation recommended for the years 1897-8 of seven thousand eight hundred and seventy-five dollars.

Chairman,  
W. R. Edgar, M. D.,  
Jasper N. Clark,  
W. R. Bates,

#### MESSAGES FROM THE GOVERNOR.

The Speaker announced the following:

EXECUTIVE OFFICE,  
Lansing, March 30, 1897.

To the Honorable, the House of Representatives:

Gentlemen—My attention has been called to the proposed appropriation for the purpose of exhibiting the products of Michigan at the Tennessee Centennial Exposition, to be held in Nashville.

It seems to me that the State of Michigan should be represented among her sister states on that occasion and that her various products should be exhibited. Michigan must depend to a considerable extent, for a future market, on the southern states, all of which will be interested in this exposition.

As a matter of State courtesy and business enterprise I favor such an appropriation. It would be unfortunate to permit our sister states and their people, to get the impression that Michigan was indifferent to affairs of this kind. Such an impression would affect our traveling salesmen and be in many ways injurious to our trade.

If under the rules of the House, the moderate appropriation which has passed the Senate, can be made, it would meet with my entire approval.

Very respectfully,  
H. S. Pingree,  
Governor.

The message was ordered spread on the Journal.

#### MESSAGES FROM THE SENATE.

The Speaker announced the following:

SENATE CHAMBER,  
Lansing, March 30, 1897.

To the Speaker of the House of Representatives:

In the passage of which the Senate has concurred by a majority vote of all the Senators elect, and by a vote of two-thirds of all the Senators elect has ordered the same to take immediate effect.

Very respectfully,

Charles S. Pierce,

Secretary of the Senate.

The bill was referred to the committee on Enrollment for enrollment and presentation to the Governor.

The Speaker also announced the following:

SENATE CHAMBER,  
Lansing, March 30, 1897.

To the Speaker of the House of Representatives:

Sir—I am instructed by the Senate to transmit to the House the following bill:

Senate bill No. 485 (file No. 111), entitled

A bill to amend Secs. 1, 2, 3 and 6 of act No. 138 of the public acts of 1881, entitled "An act to provide for the medical and surgical treatment of dependent children at the hospital of the Michigan University," the same being compiler's Secs. 1813, 1814, 1815 and 1816 of Chap. 43 of Howell's annotated statutes of Michigan;

Which has passed the Senate by a majority vote of all the Senators elect, and in which the concurrence of the House is respectfully asked.

Very respectfully,

Referred to the committee on Railroads.

No. 1618. By Mr. Clute: Memorial of A. G. Bruce and 10 other physicians of Albion relative to pending medical legislation.

On demand of Mr. Clute,

The memorial was read at length and spread at large on the Journal, as follows:

To the Honorable Legislature of the State of Michigan.

Gentlemen—We, the undersigned, physicians and surgeons of Albion, being personally interested in every legal enactment which has for its object the preservation of the health of the citizens of this commonwealth, respectfully petition your honorable body that House bill No. 30, now being presented for your consideration, be not enacted into law.

We do this cheerfully and conscientiously because we believe the present board are all competent and skilled men. The work is now thoroughly systematized and the results achieved are eminently satisfactory to the people and the profession throughout the State.

Further, the past history of the Michigan State Board of Health and the grand work it has been enabled to accomplish through the hearty co-operation of local boards of health in conserving the health and sanitary condition of our people, has not only saved annually thousands of precious lives, but it has gained for Michigan an enviable place among the eminent sanitarians of the country and the world.

We believe that by retiring this board and appointing a new board much valuable experience will be lost, and the work in the future would, for a time at least, be largely experimental.

We also respectfully petition that House bill No. 474 be enacted into law, as we recognize that act No. 146, laws of 1895, requiring that there shall be taught in every school the method by which dangerous communicable diseases are spread, has imposed a financial burden upon the State Board of Health, which, with the present limited appropriation cannot be met. But the importance of that measure as an educator in sanitation demands that it should be carefully complied with, and therefore justice, coupled with the safety and health of our people, urge that a further small but sufficient appropriation should be granted the State Board of Health.

A. G. Bruce,  
A. M. Haight,  
Rolland L. Parmeter,  
A. H. Burleson,  
H. D. Thomason,

F. E. Palmer,  
F. Elizabeth Palmer,  
Edward L. Parmeter,  
Meta Howard,  
C. L. Barber.

Referred to the committee on Public Health.

MESSAGES FROM THE GOVERNOR.

The Speaker announced the following:

EXECUTIVE OFFICE,  
Lansing, April 2, 1897.

To the Speaker of the House of Representatives:

Sir—I have this day approved, signed and deposited in the office of the Secretary of State,

House bill No. 230, being

An act to authorize the use of any thoroughly tested and reliable voting machine at any election held in this State.

Respectfully,

H. S. Pingree,  
Governor.

The message was ordered spread on the Journal.

The Speaker also announced the following:

EXECUTIVE OFFICE,  
Lansing, April 2, 1897.

To the Honorable, the House of Representatives.

Gentlemen—I return herewith, without my approval, House bill No. 1212, entitled "An act to revise and amend the the charter of the city of Flint."

Since this document came into my hands I have received protests from more than 1,600 electors of the city of Flint, protesting against this charter becoming a law.

I have also received letters and telegrams from 33 persons, also electors of the city of Flint, asking me to sign it.

I have accorded to the persons interested on each side a hearing, so as to arrive as nearly as possible at the wishes of the people of the city who are interested in this act. It has been made clear to me that the people of Flint have had no opportunity to examine this charter before its passage; that important changes are made in which all the people of that city have a deep interest.

I am aware that under our present system, and in the hurry of legislation it is impossible for the legislature to examine with any care, charters prepared in this way, and that it is the usual practice to take the word of the local representatives as to whether or not they are desired by the persons interested in them. The system is one attended with many mischiefs.

Those who protest against the charter under consideration claim to be a majority of the electors of the city to be affected. It is a striking circumstance of the necessity of some provision by which home rule may be given to our cities, and the people to be affected may make such changes in their organic law as suit themselves, and as cover the conditions existing. A change in the present system would secure to every municipality a charter in accordance with the sentiments of its people. It

would at the same time save the legislature from a waste of many months which are taken up in passing local measures, and give the representatives of the people time to consider matters of general State importance.

I cannot too strongly condemn the practice which prevails and which permits a few people in any city to go to the legislature and obtain the passage of an act in which all the people are interested, but in which only a few are consulted.

Home rule in cities, as well as in states, is the only rule consistent with our system of government. The other system permits a few designing people to impose upon their fellow citizens obnoxious laws, and a system of government which they disapprove. In a republic the majority should rule, and no change should be made in the charter of a city, except by the consent of the people of that city.

But I do not discuss any of the provisions contained in this charter. My objection to it is that it is obnoxious to the people who are to be affected by it, or to the majority of them.

Under these circumstances I cannot approve it.

Very respectfully,

H. S. Pingree,  
Governor.

The message was ordered spread on the Journal.

The question being, as required by the constitution, on the reconsideration of the vote by which the bill was passed,

No. 1721. By Mr. Clute: Petition of Grange No. 200, Homer, Calhoun county, asking the passage of the Wagar bill.

On demand of Mr. Clute,

The petition was read at length and spread at large on the Journal, as follows:

To the Honorable, the Legislature of the State of Michigan:

Gentlemen—WHEREAS, The taxpayers of the State, and especially the great agricultural class, who for State purposes pay vastly more than their proportionate share as based upon value of taxable properties, are forced by actual necessity to strict economy in all expenditures, and so rigid is said economy that the advanced schooling of children is curtailed, and many of the essentials in maintaining ordinary social standing, repairs on farm properties and buildings are of necessity foregone. It is in line with reason and simple justice to ask that salaries of public officials be fixed at a point in sympathy with those who employ and pay for such services; therefore

Grange No. 200, of Homer, Calhoun county, most respectfully ask for the passage into law of that which is known as the Wagar bill, and which contemplates the above justifiable changes in the salaries of certain State officers and employees.

Ann A. Banks,  
Secretary.

A. E. Howell,  
Master.

Referred to the committee on State Affairs.

#### COMMUNICATION.

Mr. Sawyer presented the following communication which was read and ordered spread on the Journal:

#### STATEMENT AS TO INCOME AND NEEDS OF THE LAW DEPARTMENT OF THE UNIVERSITY.

##### INCOME.

The law department for the past twenty-five years has been much more than self-sustaining. The revenues some years have been nearly or quite \$10,000 in excess of the expenditures. This surplus has gone into the treasury of the University. The following, taken from the treasurer's books, is a statement of the receipts and disbursements during the past three years:

	Receipts.	Disbursements.	Surplus.
1894 .....	\$26,015.00	\$22,104.45	\$3,910.55
1895 .....	31,305.00	22,130.37	9,174.63
1896 .....	30,785.00	28,233.98	2,551.02

In 1896 the department changed from a two to a three years' course. This made necessary an increase in the instructing force, and accounts for the falling off of the surplus for that year. But with the three years' course fully under way, we may expect a largely increased attendance. If the entering class of next year is equal in size to the entering class of

this year, and this we may reasonably expect, the total attendance in the department will fall little if any short of eight hundred students, an increase of two hundred over the attendance of this year. This will mean an increase in the revenues of the department of \$8,000 or thereabouts, and as there will be no increase in expenses on account of the larger attendance, the surplus will be brought to about \$10,000.

#### NEEDS.

The department has outgrown its present quarters. We shall have next year three classes, each numbering respectively, three hundred, three hundred, and two hundred students. In many of the subjects, in all, indeed, in which instruction is given by lecture, a class is not divided. We have but one lecture room that is large enough to hold an entire class. As each class has at least three exercises each day, it is necessary that some of the exercises of the different classes come at the same time. It will be seen at once that it will be practically impossible to conduct the exercises of the three classes next year unless some provision is made for another lecture room with a seating capacity of at least three hundred. We are able to get on this year by reason of the fact that the senior class, on account of the change to the three years' course, is small, numbering only about fifty, and can be accommodated in one of the small class rooms.

More library room is needed. There is only seating capacity in the present library room for about one-third of the students in attendance. The entire room should be given up for reading purposes, and another room should be provided for the books. The library is now a large and valuable one, and it should have fire-proof accommodations. It is false economy, in my judgment, to keep so valuable a collection as this one now is, so exposed to damage or destruction by fire. In case it should be destroyed, the department would be sadly crippled.

Respectfully submitted,

H. B. Hutchins,

Dean.

Referred to the committee on University.

No. 1787. By Mr. Bates: Resolutions of the common council of the city of Flint relative to the bill to amend their charter.

On demand of Mr. Bates,

The resolutions were read at length and spread at large on the Journal, as follows:

(Official proceedings.)

An adjourned meeting of the common council of the city of Flint, held in the council chamber, in the city hall, Tuesday evening, April 6, 1897, at 7:30 p. m.

By Ald. Lovell:

WHEREAS, For several years it has been manifest to those acquainted with our city's financial affairs that the restrictions of the charter upon the power of the council to raise money for ordinary expenses have been too narrow, and

WHEREAS, This council, in view of the circumstances, in December last caused to be appointed a committee of its present members and of leading citizens of the city heretofore connected with the city government and familiar with its needs, to recommend amendments, and

WHEREAS, Said committee reported to this council in January last recommending certain changes in the charter in the interest of honesty,

economy and efficiency, and that the charter be redrafted so as to include their recommendations and harmonize its provisions; and

WHEREAS, A bill to revise the charter in accordance therewith was ordered prepared, presented to the legislature and published, and

WHEREAS, These matters have been generally before the public and the daily papers have kept the people fully posted in regard to them, and the amendments have met with general support and approval by our constituents, aside from a few very active persons who had personal and political interests that were being subserved under the old charter, which interests the revised charter took away because not conducive to the public good, and

WHEREAS, Said bill, with certain amendments, passed both branches of the legislature and was presented to the Governor for his approval, and

WHEREAS, The Governor has vetoed said bill, claiming that he was informed by committee and by a large number of petitions that the people of this city were generally hostile to said charter, and that the latter was got up by and in the interest of private parties, which averments this council, especially in view of the results of the late election, believe and hold to be unfounded in fact, and that the Governor was misled, and overlooked the fact that the bill was prepared by the city representatives in the interest of and solely for the benefit of their constituents and has only been opposed by those having private interests and ambitions to subserve, and

WHEREAS, It is necessary that the bill pass to enable the city to meet its accruing obligations and provide for its greatly needed street improvements, and

WHEREAS, Its passage will give employment to idle men desirous to earn a living for themselves and families, foster public improvements and at the same time not at all increase the rate of taxation in the city; therefore

*Resolved*, That we earnestly petition the legislature to pass the charter bill over the head of the Governor's veto, and save us from the injury we feel sure his excellency has been unwittingly misled into doing our little city. Our successors in office will exercise the functions granted by the proposed new charter and we have every confidence that they have been and will continue to be wisely chosen and that true home rule requires that they be given power to wisely exercise the trusts committed to them.

*Resolved*, That a certified copy of this preamble and resolution be forwarded to our representative in the legislature, Hon. Wm. R. Bates, for presentation to the House and that we ask in the matter the aid and influence of all who will assist us, and especially our Senator and Representative Goodyear.

On motion of Ald. Lovell the preamble and resolutions were unanimously adopted.

On motion the council adjourned till Thursday, April 8, 1897, at 7:30 p. m.

Fred P. Baker,  
City Clerk.

Referred to the committee on City Corporations.

By unanimous consent:

By the Special Railroad Investigating committee:

In compliance with the resolution creating your special railroad investigating committee, we respectfully submit herewith in brief manner as possible, a review of our labors in which is presented the action of the committee and the results which have been reached through its inquiries.

This investigation and inquiry have been conducted in a fair and impartial manner, with a view of giving to the legislature as near as possible, the methods and practices of the railroads of Michigan in their relation to the people in the matter of freight traffic. The committee realized the importance of the duties imposed upon it, and the difficulties inseparably connected with an attempt to ascertain the methods of doing business of so large corporations as those engaged in a business of so great magnitude of handling the freight of a great State like Michigan, that has many large business interests.

Your committee was created upon the theory that there was a general demand upon the part of the people for legislation correcting the abuses believed by them to exist and within the power of the legislature to remedy. Your committee could have no knowledge of who the parties of the State might be who had grievances or knowledge of grievances, which existed, and much time was necessary to get the fullest possible information of the purpose of the committee before all the people, so that the humblest citizen of the State might have an opportunity to lay his complaints before the only body having power to legislate remedies. The time at the command of the committee was so limited that under the most favorable combination of circumstances, they could hope to make but the most superficial investigation. As the investigation progressed the committee discovered that many shippers who felt that they had real grievances hesitated to present them through a feeling of fear of affecting their business interests. Conditions of this character will be well explained by the following extract from one of the letters received:

"I am fully convinced that the road has constantly discriminated against me, but, of course, I have no redress, for it is hard to get proof of the fact, and should they find out that I sent you this information they might discriminate still more; so, if possible, I would request that my name be not mentioned."

We therefore determined upon a method of advising the people of the existence of this committee and its functions. We prepared an extensive list of shippers and sent to each a circular letter stating the nature of the committee's work and inviting them to give the committee any information they might possess in regard to the subject matter. These circulars were sent to shippers in every county of the State and on every line of railroad and to persons doing business on these lines at both competing and non-competing points. Fearing the circular letter might not reach all interested a similar notice was sent to each of the five hundred newspapers in the State, with the request they publish the same so that local dealers and shippers not otherwise reached might be informed of the opportunity offered them to make known their grievances, and we have evidence that our request was very generally complied with. In addition to these methods pursued by the committee, Governor Pingree issued a proclamation appealing to all persons in the State who had

knowledge of any violations of railroad law, or of discrimination or other matters which ought to be corrected, to lay them before the committee.

Your committee felt assured that with the broad invitation extended to all persons interested in any way or having knowledge of any abuses on the part of the railroad companies to present the same, and broadest possible circulation given to such invitation, that when the work was completed the results would be what the people in the State made them, as the committee had no desire to do but exact and impartial justice to all concerned; and we now feel at the close of our labors that every citizen of the State who did not present to the committee any grievances or complaints has no longer an excuse for saying the opportunity has not been presented for him to lay before the legislative branch of the State government his complaint with reasonable assurance that whatever could be done by just legislation to correct the evil existing would be done.

The invitations were not extended to simply a class of shippers, but all alike were asked to present their grievances so that the humblest citizen and the smallest dealer in the State has the same opportunity to be heard as the most influential citizen or wealthiest corporation.

In view of the liberal circulation of the committee's invitations and other efforts to get information, the responses compared with the whole number of persons interested were somewhat limited in number and may be definitely classified as follows:

First, Those that gave information in regard to actual discriminations or other matters which, on their face look like reasonable cause for complaint.

Second, Those that gave information in regard to matters which, no doubt, the writer regarded as just cause for complaint, but were the results of only such mistakes as are constantly occurring between men of all branches of business, and could have been remedied by the interested parties, and were not such matters as require legislative attention.

Third, Those that had no reference to the subject matter to be considered by the committee at all, but treated of questions for which there is already plenty of law, or dealt with individual opinions which, however valuable, were not what the committee was seeking.

Fourth, Those speaking in complimentary terms of the railroads of the State and giving assurances of the writers that they had no cause whatever for complaint.

Your committee submit herewith extracts from some of the letters of each class that you may judge more accurately their nature and scope.

The following are from those designated under the head of "First class":

"The F. & P. M. R. R. at this time are giving the McMoran Elevator Co. the privilege of billing oats at any station on their line this side of Saginaw through to New York and Boston rate points, with privilege of stopping the car here at Port Huron at the McMoran elevator for cleaning or clipping the oats without any extra charge, while we are denied this privilege and have been at all times in the past. The result is this, we are obliged to bill our oats in to Port Huron on a local rate and then after cleaning to bill out on a local rate—making a difference of one cent per bushel, and you can readily see the result when we are handling the grain on a profit of only one-half cent per bushel. Several times I have

had cars of oats shipped in to Port Huron billed to us and when we were forced to buy on basis of value with local freight in and out, we lost the oats and the party who shipped sold the oats to McMoran Elevator Co. and the local billing was taken into the F. & P. M. freight office at this place and exchanged for through billing from point of shipment, thereby making a big profit, where a local freight in to Port Huron and out would have made us a loss. We ask for no privileges not accorded to others but feel that we should have the same as others.

By way of illustrating again, will say that grain rate from Ubyly to Port Huron is five and one-half cents per 100 pounds and from here to Boston points seventeen and one-half cents, making a total of twenty-three cents where a local billing is used to have oats stopped here to clip and clean, whereas the McMoran Elevator Co. can bill out of Ubyly to Boston rate points at twenty and one-half cents, making a saving of two and one-half cents per cwt. If this is not discriminating, I don't know the meaning of that word.

And again we have another fraud of this kind: when we ship a car of freight away and for any reason it's refused by the purchaser and stands on track over four days, we have to pay \$1 per day car service; and at same time if we have a car sold for future delivery and the railroad company choose to take 10 to 20 or 30 days, and price of the product should decline in market, the purchaser after failing to receive his stuff refuses it, and the shipper has to pocket a loss in difference of values occasioned by the delay on account of railroad company's failure to deliver promptly, and a possible chance to pay a few dollars for car service on account of losing a sale and necessary time to make another sale. The railroad company should be restricted to same number of days to deliver goods that the shipper has to take care of them, and to show this fact up more plain will give you a case of my own: Last October I sold Pitt Bros. & Co., of Baltimore, Md., fourteen cars oats, and same was shipped from October 10th up to November 7th, and they were run through to Baltimore and in consequence of rush of freight were held outside of the city until January 1st, and last car was run in January 11th—consequence was that I lost sale made to Pitt Bros. and resold to Wm. Hopps & Co., and as the price kept declining slowly but steadily, after a reasonable length of time Hopps refused to take them, and at last I was forced to turn them over to a commission house to be sold, and at same time the railroad company ran them into an elevator which caused an extra expense of one cent per bushel—making a loss of \$350 on the lot to me."

"Dear Sir—The F. & P. M. R. R. asked me one dollar per M for shipping brick from Avoca to Yale, about five miles, and they shipped brick from Clilo to Yale for ninety cents per M, and by their doing that it lost me the sale of 700 M brick. If you bring this before the F. & P. M. R. R. folks you can refer them to shipping for the Yale woolen mills and the Yale grist mill. I think the distance they shipped for ninety cents is about ninety miles."

"Dear Sir—I hand you herewith some expense bills which speak for themselves. I had purchased several cars slab wood for my laundry fuel in Cadillac, and same bought and shipped on three and one-half cent rate as expense bill for 1896-97 will show. I purchased from a party at Ashton, one car load, which is 23 miles nearer Kalamazoo than Cadillac, thinking of course rate would be three and one-half cents, same as from

Cadillac, but the company would not make Cadillac rate, as they alone would haul the mill refuse to some point when offered for shipment, the difference on the car load is just \$2.04. If they can haul a car Cadillac to Kalamazoo for three and one-half cents they certainly can from Ashton to Kalamazoo, being 23 miles nearer."

"Freight Cadillac to Kalamazoo, wood, 37,000 lbs., rate three and one-half cents; freight, \$12.95.

"Freight Cadillac to Kalamazoo, wood, 30,000 lbs., rate three and one-half cents; freight, \$10.50.

"Freight Ashton to Kalamazoo, wood, 48,000 lbs., rate four cents; freight, \$16.30."

"Distance Cadillac to Kalamazoo 147 miles. Competitive point rate, three and one-half cents.

"Distance Ashton to Kalamazoo, 124 miles. Local station "non-competitive" rate, four cents. Ashton 23 miles shorter haul and one-half cent higher."

"March 6, '97.

"Mr. J. F. Widoe—

"Dear Sir—Your circular to hand. We are glad for the opportunity of expressing some of our grievances in regard to the F. & P. M. R. R.

"J. S. Stearns, of Bennett, Mich., has a rate of \$1.00 per car on logs from points on F. & P. M. R. R. to his mill at Bennett in consideration of his shipping his manufactured product over the said road. The railroad company grant us a rate of \$3.00 to \$5.00 per car for a like agreement to ship our output over the road. Brayman of Custer pays only half what we do per mile. The Ludington Woodenware Co. and Cartier Enameling Co. of this place also pay \$1.00 per car less from Fountain and Bachelor than we do.

"This is simply because they have more influence with the traffic manager than we have. It seems to us that inasmuch as we have to meet the same competition in certain lines as they we should be granted an equal chance. Again we have received more logs this winter than any two of the before-mentioned concerns. In fact they cannot advance any reason why we should be so treated."

After a few days the above letter was followed by the following:—

"Dear Sir—Your favor to hand. The F. & P. M. have reduced our rate from Fountain to Freesoil so that we will withdraw our complaint as given in our recent letter to you."

Under date of April 1st, evidence of satisfaction was evidenced as follows:

"The F. & P. M. have reduced our rates and I can not see of what use to our company it would be for me to go now to Lansing."

"Dear Sir—We have no personal discrimination to complain of, but we would call your committee's attention to the following. While this matter may not be illegal, it is certainly discriminating against other parties.

"It is a usual custom among railroad companies to carry lumber to certain points to be stopped off at intermediate points to be 'reworked' at what they call a 'stop-over' charge, usually about \$3.00 per car. This lumber is then worked, and the freight charges take the rate from the

point of shipment to destination, with the 'stop-over' charges added as advanced charges.

"This gives the intermediate shipper an advantage over what he would have to pay had he been compelled to pay the local freight from original point to his place, and the local rate to the intended point of delivery.

"The point we desire to illustrate is Holly, Mich. The local rate from Bay City to Holly is four and one-half cents, and from Holly to Detroit the rate is four and one-half cents, while from Bay City to Detroit the rate is six cents. You can thus see that the Holly shipper is getting a decided advantage by having this 'stop-over' privilege of \$3.00 per car. Now, while there may be nothing illegal in this 'stop-over' charge, in this instance, it is placing intermediate shippers at a disadvantage as I will illustrate. The Holly Manufacturing & Lumber Co. is engaged in the manufacture of box shooks, as well as the *retailing* of lumber and hence on all the stock that he sells at *retail*, he gets a freight rate of \$3.00 per car, while the retail dealer at Flint is compelled to pay a rate of four and one-half cents, we think, as against the Holly rate of \$3.00 per car.

"A car weighing 30,000 pounds would cost the Flint man \$13.50, and the Holly man \$3.00. The Flint party not being engaged in the shook business cannot ask the same 'stop-over' privilege, but must pay regular local rates and he is compelled to meet the Holly man in retailing to the country trade as to prices. The Holly man pays about 20 cents per 1,000 feet freight and the Flint man pays about \$1.15 per 1,000 feet freight, and both are selling the surrounding country at the same prices, at least the Flint man is compelled to sell as low as the Holly man, or lose the trade when they come in competition."

As representing the second class we give you herewith statement of charges on hay from Manitowoc to Manistee, \$380.90 and added thereto was a switching charge for 38 cars of hay from the railroad company's dock to warehouse, \$114.00; and the following upon that subject:

"The expense bill attached, \$114.00, switching charges. We never would have paid it only that when we landed in Manistee with the goods we had the agent wire the agent at Flint (Mr. Murray) to guarantee the freight. He did this for us. Some days afterward the bill came down, Mr. Murray, agent at Flint, came to our office with it and we objected to paying it on account of the switching charges being charged. Mr. Murray would not believe us when we told him that we had it switched to our warehouse. Our warehouse being on the F. & P. M. track, and is only two blocks from where the steamer was unloaded. Mr. Murray claimed that we must have had it switched to the Manistee and Northeastern R. R. Mr. Murray after a great deal of correspondence with the head office, said that the reason that we were charged with the switching was that we delayed the boat."

"Dear Sir—I have just received another letter that I enclose for your inspection as evidence that one has a continuous job on hand if he does much shipping in getting his or helping someone to get their overcharged money back from railroads companies.

"This overcharge was made on a machine shipped to Mr. Ryan on Dec. 12th last; machine was not prepaid; weight of machine was over 4,700 pounds and rate should have been 48 cents per 100 pounds or an overcharge of over \$7.00. He wrote me and I worked some three weeks and then received papers which I sent to Mr. Ryan at Allentown, Pa.,

with instructions that they be presented by the one that paid the freight and he would get his money by presenting these papers to the freight agent that he paid the freight to, which was done, and I enclose you his reply, to my letter to him asking him how much he received from the overcharge on the machine shipped him."

"I enclose you one of the mistakes of the railroad, would say that this machine was weighed on their scales, and the weight was 4,570 pounds, and the rate to New York was 46 cents per 100 pounds, which amounted to \$21.02 which I prepaid at Jackson, Mich., and on arrival of the machine at destination there was an extra charge of \$6.40 making \$27.42 which the American Box Machine Co. agent at New York paid and sent word to headquarters at Amsterdam, N. Y., and they deducted the amount from my invoice to them, and I had to collect it from the R. R. Co. at Jackson which took some four weeks."

The following illustrate letters of the third class:

"Dear Sir—If the committee appointed by the Speaker of the House of Representatives of which you are chairman have the power to investigate in the interests of the people in regard to the drain law I would like to know if section 17 of chapter 3 of drain laws of 1896 is held by the courts to be good law. The township of Denmark in Tuscola county and the people interested in the drain known as the "Van Patton Drain" was forced to pay \$14.75 in labor to get a crossing over the S. T. & H. R. R. The drain was an old county drain constructed years before the railroad was built, but if the court decides to look such matters up I will send papers."

"Dear Sir—As chairman of the grievance committee of the Governor's railroad proclamation, I would like to call your attention to the high-handed dealings of the Ann Arbor railroad. In consideration of station and side track to be maintained by the railroad, which provision is also in the deed, I gave them the right of way for two hundred rods through the very best of farming land. They built a depot and have always taken passengers and freight till Feb. 1st last, and now they refuse to recognize the station in any way.

"I also built an elevator on their siding at an expense of eight hundred dollars, and now they have taken up the siding and refuse to ship my produce.

"Last summer they took up my private crossing and refuse to replace it, which is a great inconvenience, as I have to go farther and over bad roads to get my produce from the farm to the barns."

"Dear Sir—In my humble opinion nothing short of 'government ownership' of the railroads can ever bring about the reforms your honorable body seeks. Meantime, I think it might be well for your committee to inquire into freight rates on kerosene oil, and suggest such change in the law, so that people living along the Lake Shore & Michigan Southern R. R. in this State, may have as low rates as people of Lansing. We pay more on this line of goods here than Lansing and the reason assigned is said to be on account of difference in freight rates."

Letters of the fourth class are substantially of the following tenor:

"Our business on the F. & P. M. line, with which we have direct connection, have no cause whatever to complain, being treated in a fair and courteous manner in all our business with them."

"No complaints to make. Are satisfied with the treatment the railroads accord us."

#### Discriminations.

The most serious complaints made were regarding discriminations, which are claimed under various forms, chiefly in making better rates to large shippers than to small; in some cases extending privileges to some not granted to others. These privileges in some instances consist in permitting carloads of grain to be billed from some point in Michigan to eastern points with "stop over" privileges for cleaning and clipping grain, or allowing "stop over" privileges with lumber for dressing upon the theory that such lumber would be reloaded and shipped. It was claimed in some cases that communities were discriminated against by making a better rate to other towns about the same distance from shipping centers; in other cases are discriminated against in train service, especially in fruit growing sections where a special car service is needed.

The most clear and definite charge of discrimination was made by the Port Huron Elevator Company of Port Huron. This company claimed that they were refused certain through billing and "stop over" privileges that were accorded other firms in Port Huron engaged in the same business, the results of such discrimination being clearly and fairly well recited in letter No. 1 under the head of "first class."

George A. Groves, manager of the Port Huron Elevator Company, went before the committee, and testified that he was engaged in the business of buying and shipping grain at Port Huron, Michigan; and he shipped over the F. & P. M. road. That the statements made in letter No. 1 heretofore recited were made by him, and were true to his personal knowledge, and that he had applied at different times to the agent of the F. & P. M. road for a "stop over" privilege for his grain going east and had been refused until about March 17 last, when he received the following letter from the company's agent at Port Huron:

Port Huron, Mich., March 17, 1897.

Geo. A. Groves, Esq., manager Port Huron Elevator, city:

Dear Sir—Referring to your application for transit privileges on grain from F. & P. M. stations to stop off at your elevator for clipping.

We are willing to handle this property on the following conditions:

Grain to be consigned to yourselves at Port Huron and when reconsignment is required original bill of lading to be surrendered when a

new bill of lading will be issued from point of shipment to final destination. The freight charges on original shipment to Port Huron must be paid at time of delivery of the property which can be refunded when reconsignment takes place.

Please reply.

Yours truly,

C. A. Stewart,

Agent.

The following is Mr. Groves' testimony on the subject matter contained in letter No. 1, first class:

"By Mr. Widoe (to Mr. Groves)—Did you ever make more than one application for this privilege?

By Mr. Groves—For stop over privilege?

By Mr. Widoe—Yes.

By Mr. Groves—Yes, at several different times. Once last fall we were shipping through and wanted it, and we couldn't get this stop over privilege which we had been asking for, and grain was delivered from the F. & P. M. railroad to the Grand Trunk, at the Griswold street station at Port Huron, and I paid the Grand Trunk switching charges to get the grain to the elevator and clipped it; and after that, the first of November there was a change made in all grain delivered to the F. & P. M. It was delivered to the Grand Trunk, was delivered to Almont Junction about two miles out of town, and we couldn't get the cars in from there because they came over the Chicago & Grand Trunk, and the Grand Trunk terminals, so that each company wanted a switching charge, and it cost me too much, and from that time I asked for the privilege at least a half dozen times; and about four weeks ago I found out that Mr. McMorin had been having this privilege, and I found out he had had it for over a month nearly. No one had been apprised of that fact; I mean others that had asked for it had not been apprised of it. I went into the freight office at Port Huron and asked Mr. Stewart, the agent there, to wire Mr. Patriarche to give permission to stop off grain, and he said he would, and in my presence he wrote a telegram and wrote a letter, and he got his reply and I read his reply. Mr. Patriarche stated emphatically that he didn't care to enter into any agreement for cleaning, but with the McMorin Milling Company. The letter is on file at the Port Huron office and I saw it again day before yesterday and read it. Now, if Mr. Patriarche did not know it, and did not read this telegram and letter of Mr. Stewart's nor write to Mr. Stewart, I don't know why Mr. Stewart should have the letter. Mr. Quail, of Crosswell, also wrote Mr. Patriarche, and he got permission to bill out his grain, and he billed one car out and came to Port Huron and they refused to deliver it to the elevator, and stated they would run it right on through as it was if I didn't take it up. Rather than to have the car go through uncleaned I paid the local freight, I did, and took the car up to Port Huron. Mr. Dodge came in from Avoca, and said he had a car billed out there for me, and he paid the prices on the basis of what McMorin would give him, cleaned and clipped at Port Huron, and I couldn't do it, and he stated if I couldn't take it at the same, he would have to sell it to McMorin and he went out and sold it to McMorin and it was billed through. Those are facts I know. I am not stating anything I don't know."

Mr. A. Patriarche, Traffic Manager of the F. & P. M. R. R., in regard to complaint of Port Huron Elevator Company, in reply to an inquiry from a member of the committee as to whether he knew anything about the matter complained of by said company, testified as follows:

"By Mr. Patriarche—Why, I think it is about three months ago that we went into that clipping in transit. We declined to go into it before that for anybody, and—but on account of the practice being in vogue on other Michigan roads, we saw that those who were doing business on the F. & P. M. would have to do the same thing in order to get their product to the eastern markets in the same condition. We went into it on the application of one firm who asked us to do it (that is the McMorin Elevator), and we agreed to it. And this case of Mr. Groves came up later, and I didn't know anything about Mr. Groves' relation to this traffic, and dropped it there, it was never—we have never made any direct application to the general offices, he hasn't—his application was made possibly to the agent at Port Huron and the agent at Port Huron couldn't do it unless he received his instructions. There are certain rules and regulations that have to be carried out in regard to this clipping and cleaning in transit; but we have since then, since we have known of Mr. Groves' business, and what he desired us to do, he has got the same arrangement.

By Mr. Green—When was this matter first brought to your attention, Mr. Patriarche?

By Mr. Patriarche—First brought?

By Mr. Green—Yes, this complaint of Mr. Groves'.

By Mr. Patriarche—I guess it was three or four weeks ago, three weeks ago. If Mr. Groves had applied to the general offices for the privileges of conducting that business he wouldn't have been refused.

By Mr. Green—Was it through Mr. Groves that you first learned of this?

By Mr. Patriarche—No; through a personal interview with the agent at Port Huron.

By Mr. Billings—Wasn't it that agent's business to forward such applications to your office, or does it stop there?

By Mr. Patriarche—Well, of course, it is his business, Mr. Billings, but he don't know anything about no applications; he has certain instructions, he has got to keep those instructions, and if he hasn't any instructions to recognize his handling grain in transit for firms, he hasn't been authorized to allow—he can't do it. There is nobody goes into that business unless they come into it as a special railroad business, it is not a general traffic at all. We have got any quantity of elevators doing business that are not engaged in this clipping and cleaning at all. Those who come into it, come into it with an arrangement with the railroad companies. It is not in the general line of doing business today. You take it in the west, where there is hundreds and hundreds of elevators, yes thousands, there are only a few that are engaged in this business.

By Mr. Green—Is Mr. McMorin a stockholder in the F. & P. M.?

By Mr. Patriarche—No, sir; not that I know of.

By Mr. Billings—Then if there was any elevator company that wanted to go into this, they would have to make application to the general office?

By Mr. Patriarche—They make an application, and it will be recorded like any other."

Mr. Patriarche also testified that the privilege asked for by the Port Huron Elevator Company was generally granted now when asked for, in case it was feasible.

By Mr. Billings—Is this privilege more general now, Mr. Patriarche?

By Mr. Patriarche—Of course, this Mr. Groves speaks about, it is general to those who desire to go into it.

By Mr. Billings—On general applications?

By Mr. Patriarche—Wherever it is feasible. The time that Mr. Groves complains of, wasn't feasible as far as to connect it with Port Huron elevators.

By Mr. Billings—What do you mean by feasible?

By Mr. Patriarche—The point of delivery had not been decided on, between the Grand Trunk and the F. & P. M. There is more responsibility attached to handling grain in transit; somebody has got to be responsible, when it leaves the possession of one company and passes into the elevator. That is why Mr. Groves was subject to that switching charge he speaks of between Almont Junction and Port Huron. There had never been any facilities provided for at Port Huron in connection with grain from the F. & P. M. railroad to carry it on, because the F. & P. M. loses that grain after they deliver it to the elevator. Now, that responsibility had to be decided; as to who is going to be responsible for the grain. We have got to get that grain back again in some way or other. We were not in a position to go into the business to do this clipping in transit until, I say, about three months ago. These other parties desired to go into the business a long while ago, and now Mr. Groves has got that privilege, and has had from the time he says. The elevator loads into the Grand Trunk and it doesn't come back into our possession. We cannot make a delivery to connect right there at the elevator. We have got to make a direct delivery to the road. You see, in this clipping business the elevator stands between two companies, and after grain goes into the elevator, why the road that delivers it want to know whether they are going to get that car of grain again. It doesn't come back to them after it is cleaned, and it follows there must be some arrangement between the two railroad companies so that the connecting company will take the grain from the elevator and relieve the other road."

It is charged by shippers living at Ludington that some get a rate of \$2 per car for hauling logs to given points, while others are charged as high as \$5 for hauling the same distance.

These charges are affirmed by the testimony of Mr. Patriarche, and explained by him as being justifiable from a business standpoint; the logs hauled at the low rate being manufactured into lumber and the manufactured product all re-shipped over the same road, while in the other cases the manufactured product was re-shipped by water.

(See page 49 of the record for further testimony on that subject.)

The question of discrimination, privileges, and rates have been more fully mentioned in this report because of their greater importance and a full measure of attention given it.

In the matter of excessive charges, the committee find upon examination that freight charges are with rare exceptions uniform upon the same road, and conform to the official classifications made by the Joint Traffic Association and the western classifications will cover this State. As these rates are, as stated, generally uniform, it is not within the power of this committee to state upon superficial investigation whether such rates are excessive or not. The general tendency of freight rates during the past ten years had been steadily downward; the exceptions to this fact are confined to short roads peculiarly situated as to volume of business and competition.

In this connection it may be interesting to note that the average cost in this State, as compared with the entire country in 1895, the charge for carrying one ton one mile on thirteen of the leading roads of the United States was 72-100 cents, and these roads carried one-third of the Nation's freight; the average charge for the same haul on all the roads in Michigan for the year 1895 was 76-100 cents or but 4-100 cents higher than the average of thirteen of the principal roads of the country, and the traffic in Michigan is largely local.

It is also noticeable that the rate per ton per mile is lower in Michigan than either Ohio, Illinois, Iowa, Minnesota, Missouri or Kansas.

In view of these facts it must leave the question as to whether or not these rates are excessive to the good judgment of the legislature and their constituents.

There are several complaints filed referring to excessive charges in transportation of live stock. Your committee are of the opinion that the foundation for these complaints rest not so much in the rate per

hundreds being excessive as the arbitrary classification of weights of live stock under which the same are carried. We find the following rules governing the weights under which stock is shipped in less than carload lots in Michigan:

One horse, mule or horned animal, is billed, at first-class rate .....	4,000 lbs.
Each additional horse, mule or horned animal, at first-class rate.....	3,000 lbs.
One cow and calf, at first-class rate.....	4,400 lbs.
One mare and colt, at first-class rate.....	4,400 lbs.
Calves under six months old.....	500 lbs.
Calves over six months old.....	4,400 lbs.
Stallions .....	5,000 lbs.
Hogs .....	500 lbs.

To illustrate the working of this classification as applied to a shipment, we submit the following:

One horse (or cow), from Greenville to Detroit, a distance of 145 miles, at the present rate of 30c per cwt. is \$12.00.

Two horse (or two cows), same distance, would be billed 7,000 lbs. and cost \$21.00.

One cow and one calf, same distance, billed 2,400 lbs., cost \$13.20.

One stallion for same distance, billed 5,000 lbs., cost \$15.00.

To aid in determining whether these stock rates are excessive it may be helpful to compare them with the rates for stock in Illinois. The classification of weights for live-stock in Illinois, is as follows:

One horse, mule or horned animal.....	2,000 lbs.
Each additional horse, mule or horned animal..	1,000 lbs.
One cow and calf.....	2,500 lbs.
One mare and colt.....	2,500 lbs.
Calf under one year old.....	500 lbs.
Cattle over one year old .....	2,000 lbs.
Stallion in Illinois.....	2,000 lbs.
Hogs .....	Actual weight.

All first-class rate, except hogs, which is one and one-half first-class rate.

Under this classification of weights in Illinois the cost of carrying animals named 145 miles in that state would be as follows:

One horse or cow, billed at 2,000 lbs., rate 44.65 cents, being \$8.93.

Two horses (or cows), billed at same distance, 3,000 lbs., would be \$13.39.

One cow and calf, 2,500 lbs., would be \$11.16, and

One stallion, 2,000 lbs., would be \$8.93.

It would appear from this that the difference in weights in these two states are more than ought properly to exist.

In the matter of the difference in weights between initial and terminal points there is a general complaint, and shippers are being constantly called upon to pay freight in addition to the amount specified at the station on account of erroneous weights. It would seem as if the weight

specified on the shipping bill at the receiving or initial points should be final.

Referring to the charges of discrimination against non-competing points it is not at all surprising that such complaints should be made, and upon their face so appear, but an examination of the published tariffs do not show any such discrimination in rates. There are individual cases which seem difficult to explain upon any rational basis except the power to make the charge.

In regard to the complaint of excessive car service charges we have as yet, no testimony upon that subject not well and thoroughly known by all shippers. There is a seeming injustice in compelling shippers to pay \$1.00 a day for each twenty-four hours a car is detained after forty-eight hours have elapsed after its arrival at destination, and yet a company may detain cars any length of time after the shipment without having to pay the shippers any damages for any such delay.

The complaint of trouble in settling claims against railroad companies and such delay and annoyance to the claimant is such as to deter many from presenting legitimate claims. While your committee realize that the business of a great railroad company is of necessity complex, the adjustment of the great mass of claims presented must necessarily take time. It would seem a reasonable proposition that railroad companies should treat their patrons in such matters as one business man does another, and better attention and greater promptness in the settlement of these claims exhibited on the part of the railroad companies, would, in the opinion of the committee, do away with the seeming large number of reasonable complaints.

The complaint has been made that shippers have to pay more for a part of a carload than for a full carload shipped to the same points, claiming that when less than a minimum carload is offered for transportation the local less than a carload rate is applied, which in many cases make the smaller quantity cost more than the entire carload. This is well shown by the following illustration: The rate on a carload of hay from Ludington to Scottville is  $3\frac{1}{2}$ c per hundred weight, costing for minimum load of 20,000 lbs, \$7.00; to ship 10,000 lbs., one-half the amount, from Ludington to Scottville, the rate is 12c per hundred weight, making the cost of five tons, or half the minimum carload, \$12.00. While we are aware of the fact that a certain rule prevails among railroad companies forbidding a charge for a part of a carload greater than for a full carload, it is a rule which may be changed at the pleasure of the roads making it. Your committee recommend in this matter that it be made unlawful to charge more for any part less than a full carload than is charged for a full carload.

The complaint is made that certain railroad companies make charges for switching on their road. This condition is absolutely forbidden by the present existing railroad laws, and parties suffering from grievance of this character have a legal remedy.

The complaint is also made that discrimination exists in the classification of products. The special cause of complaint was that beans were placed in a higher class than wheat, so making a high rate for shipment. As this subject is one of a complicated nature in the adjustment of freight rates and really determines them, the committee sought information as to the reasons for not putting beans and wheat in the same

class, and received the following letter, which gives the fullest information now valuable on that subject:

"Dear Sir—In reply to your inquiry I beg to advise that the controlling elements in rate making, the basis for which is the classification of freight, are very numerous, and generally speaking cover principally such items as the nature of the product, volume of production, uses, tonnage, bulk and weight, value, competitive and commercial conditions. The two last named may be considered as secondary to the first above mentioned.

Wheat is common and necessary to all consumers, whether rich or poor, and its value is, I believe, chief and foremost among the agricultural products. It necessarily follows that the commodity requires the widest distribution at the lowest reasonably productive rates, first, in order that the producer may receive a fair price for his property, and second, that same may be delivered milled to consumers at the least possible cost; hence, the low rates generally applicable for transportation purposes.

The production of peas and beans, used to a certain extent for food purposes same as wheat, is much smaller than the last named commodity, and they do not, of course, afford anything like the same tonnage for transportation purposes, nor are they distributed to anywhere near as wide an extent, nor have commercial conditions in the past seemed to require as low rates as applied to wheat; hence the higher basis of classified rating as compared with the last named product.

Another element, and probably one of the most important, that has produced a continued downward tendency in the rates on wheat, is the vast production of the western states, Minnesota, Dakota, etc., necessitating low rates to carry to far distant markets; this in turn affecting intermediate territory, giving from the central states lower rates on wheat than what might otherwise prevail.

A more recent element is competition for export grain from the western states, via southern ports.

No such commercial or competitive conditions exist in the transportation of beans and peas. The tonnage for transportation is comparatively light, and relatively speaking the source of productions nearer the markets.

Beans, as a rule, are shipped from the agricultural districts into the larger centers, such, for instance, as Grand Rapids, Jackson, and there picked and sorted and re-shipped. Upon the beans into these points we make very low commodity rates, charging the regular tariff rate upon the output."

From the varied mass of correspondence received by the committee many suggestions were made in the line of proposed changes in the railroad laws, and while your committee find many of these suggestions excellent, they are not prepared to recommend them all for legislative action, and in view of the short time we have had for the consideration of the real worth and merit of many of these suggestions, the principal demands that are made by shippers are substantially as follows:

First, That a committee of three be appointed by the Governor to arbitrate upon all claims and grievances between shippers and railroads.

Second, All freight tariffs should be under the jurisdiction of the State.

Third, Railroads should be obliged to furnish freight cars to shippers when served with written notice for the car to be placed for loading, and the shipper should be entitled to one dollar a day for every day or fraction of a day, beyond the 48 hours.

Fourth, The railroads should be required to furnish storage room for perishable property when such property is offered as freight, until such time as the railroad company be able to furnish cars to transport such freight to destination.

Fifth. All railroads receiving freight billed or shipped to any destination outside of the State should be held liable for any and all loss or damage resulting from any wrong delivery, loss or damage occasioned in any other way to said property while in transit to destination.

Commenting on this fifth suggestion, the present law relieves the receiving road from any and all liability of connecting lines. No carrier is liable for loss or damage not occurring on its own road.

Sixth. All fast freight lines should be obliged to incorporate under the laws of this State with offices within the State so as to be brought within the jurisdiction of the State.

Your committee recommend, if practicable, that the question of fixing the liability for loss or non-delivery of goods carried over several roads (whether within or without the State) upon the road receiving such goods, be taken into favorable consideration. That a law be passed forbidding railroad companies from charging more for part of a car load than is charged for a full car load.

That the present law forbidding discriminations be so amended as to more definitely define and specify what constitutes discriminations in freight traffic, and also remove from said law an apparent broad and objectionable discretionary feature.

That a law be passed requiring the freight bills of all roads in the State to be uniform and to be so constructed as to show the weight, the rate and the class for which the bill is rendered.

Your committee are so impressed with the importance and the magnitude and value of railroad interests and the influence of their management upon the business interests of the people, that it desires to call the attention of the legislature to the desirability of carefully considering the wisdom of establishing at an early day, a railroad commission in this State, composed of at least three persons, who shall be charged with the general supervision of railroads, under limitations of law, to fix maximum freight and passenger rates, prepare classifications, hear and adjust grievances and enforce existing railroad laws.

We recommend for the consideration of the legislature, the application of inter-state commerce laws of the United States to the conduct of railroad freight traffic in Michigan.

The 7,600 miles of railroad in Michigan represent a cost of \$300,000,000 and employ about 25,000 men, which means furnishing support to at least 100,000 persons. The said roads carry about 30,000,000 tons of freight annually; not only this, but they paid during the year 1895, according to the report of the Railroad Commissioner, nearly \$24,000,000 on account of expenses for the management of their lines. Such large enterprises so intimately connected with the success and prosperity of the commonwealth should not be subject to unjust criticism nor unfair legislation, yet they should be held to a rigid responsibility and be made to conform

to such laws as are made regulating their action, and should be made to share fairly and equally in the burdens of the people in maintaining the government, which give them life and protect them in their rights, and should neither be allowed to charge excessive rates nor discriminate in their application.

John F. Widoe,  
Chairman.

**Resolved**, That the secretary of the body be, and he is hereby instructed to forward a copy of this resolution to our representative the Hon. C. E. Foote, requesting him to place it before the committee having such bill in charge.

It has come to my knowledge that two of my distinguished colleagues, Hon. Mathias Coad of the second district of Ingham county and Hon. William R. Edgar of the second district of Lenawee county, have been pleased to take umbrage at a remark of a general character made by me concerning "doctors" in the course of a debate upon the bill relative to negotiable instruments which was under discussion in this House during the past week. I said then, and reiterate now, that I have known doctors who would not be worth three dollars a day as doctors, legislators, or in any other capacity.

I desire to state that while I have no apology to offer I do not wish my remarks made upon the occasion mentioned to be so construed as to cast any or the least reflection upon the professional or official standing or ability of either of the gentlemen mentioned.

The Speaker announced the following:

Mt. Clemens, Mich., April 16, 1897.

House of Representatives:

Mr. Rowley feels very grateful for your public expression of sympathy for him in his illness, and wishes to thank the House, Mr. Chamberlain, the Speaker, and Clerk of the House, for the engrossed copy yesterday received.

Yours,

Mrs. Wm. A. Rowley.

The letter was ordered spread on the Journal.

#### PRESENTATION OF PETITIONS.

No. 2015. By Mr. Peek: Petition of James T. Perkins and 106 other railroad employes remonstrating against any legislation to reduce the rates of passenger fares on Michigan roads.

On demand of Mr. Peek,

The remonstrance was read at length and spread at large on the Journal, as follows:

To Hon. A. J. Peek, House of Representatives, and members of the Legislature:

We, the undersigned, engaged as railroad employes and residing at the city of Jackson, State of Michigan, do most respectfully remonstrate against the adoption of the pending bill reducing passenger fares on railroads to two cents per mile.

We believe that the large capital necessarily invested in passenger cars and equipments to meet competition and furnish such service as the public demands and which mostly absorbs the earnings, will not permit of the proposed reduction of fares and the maintenance of the business at its present standard of comfort and efficiency; and that the adoption of the proposed or any similar measure will result in the impairment of the service, the reduction of the number of trains and of employes, and will not be attended with any adequate compensating benefits.

We therefore ask for the rejection of all such measures by the legislature.

Referred to the committee on Railroads.

#### PRESENTATION OF PETITIONS.

No. 2015. By Mr. Peek: Petition of James T. Perkins and 106 other railroad employes remonstrating against any legislation to reduce the rates of passenger fares on Michigan roads.

On demand of Mr. Peek,

The remonstrance was read at length and spread at large on the Journal, as follows:

To Hon. A. J. Peek, House of Representatives, and members of the Legislature:

We, the undersigned, engaged as railroad employes and residing at the city of Jackson, State of Michigan, do most respectfully remonstrate against the adoption of the pending bill reducing passenger fares on railroads to two cents per mile.

We believe that the large capital necessarily invested in passenger cars and equipments to meet competition and furnish such service as the public demands and which mostly absorbs the earnings, will not permit of the proposed reduction of fares and the maintenance of the business at its present standard of comfort and efficiency; and that the adoption of the proposed or any similar measure will result in the impairment of the service, the reduction of the number of trains and of employes, and will not be attended with any adequate compensating benefits.

We therefore ask for the rejection of all such measures by the legislature.

Referred to the committee on Railroads.

EXECUTIVE OFFICE,  
Lansing, April 29, 1897.

To the Honorable, the House of Representatives:

Gentlemen—In returning herewith without my approval House bill No. 250 to prohibit minors over the age of eight years, and under the age of sixteen years, from being upon the streets, parks and alleys in cities and incorporated villages of this State during certain hours of the night, I beg leave to state that it is a partial revival of the ancient curfew law. That law was established in England by William the Conqueror, in order to prevent night meetings of his oppressed subjects, and the name of “curfew law” was employed as a by-word denoting the most odious tyranny. In the year 1103 it was repealed, under Henry I.

While the curfew bell is rung at the present time in various parts of Europe and the New England states, it has long ceased to have the significance attached to it in earlier times, as it is only used by voluntary action on the part of societies, and as a reminder of the hour of night when parents usually require the children to be at home.

I further submit that the act provides for interference on the part of the State in matters of purely domestic concern, and seeks to interpose police for parental authority. Under such an act the evident duty of the police would be to arrest children improperly out at night, and imprison them in the station awaiting the court's action next day, thus bringing the immature minds into familiar contact with criminal courts, prisons and their surroundings, for an offense within the power of parents and guardians to remedy. The first impulse of boys would be to scheme to evade such a law; and for the State to provide for such lessons of incipient law-defying, would be to afford schooling that might eventually develop into something of a more serious nature, both for the boys and for the State.

I regret to refuse my approval to a bill founded, as I believe this to be, upon good intentions. It is a serious matter, however, to submit the citizen even when of full age to arrest. It is doubly so when the person arrested is a child. An arrest, even when followed by a small fine, classifies one as a criminal. The person arrested may be asked on the witness stand if he has ever been arrested, and he is compelled to answer. An arrest of a boy or girl, for being out at night, may put a blot upon an entire life. It not only tends to disgrace one in the eyes of others, but to destroy self respect.

Under the present law persons who are behaving in a disorderly manner may be arrested and punished. This, it seems to me, is as far as the State should go in interfering with personal liberty. The reports of the Attorney General show that we are prosecuting about 20,000 people every year for crime; this is nearly one per cent of our whole population. Nothing is more revolting than to see children in prison.

If such a law as this was aimed at parents who allow their children on the streets at improper hours, it would be much more justifiable. We must remember that the family is the unit of every civilized community, and the State cannot take the place of fathers and mothers. We must

look to them for the training of youth, and unless they discharge their duties we cannot expect to see our boys and girls become honorable men and women.

This act is also objectionable from a somewhat different point of view. Girls between the ages of twelve and sixteen are maturing. They are nearing womanhood and experiencing its sensitive modesty. It is, I believe, better to trust to that than to shame it by a law under which they could be arrested for acts entirely innocent from a moral standpoint. This law if enforced would be a constant shock to young womanhood.

It must be enforced, if at all, in courts of inferior jurisdiction, those of justices of the peace or their equivalents. To place the personal liberty of innocent girls of Michigan at the discretion of these minor courts, and the minor executive officers who serve process from them, could only result in disgracing and clouding the after life of many promising women with ignominy. The resulting evil would, in my opinion, be many fold greater than the one it is sought to remedy.

In order to restrain the few evil disposed ones the act puts in jeopardy the youthful promise of all the young maidens of the State. In disposition to do right these girls will compare favorably, in the mass, with any community on earth. The act is an invasion of personal liberty worse, if anything, than the ones that are protested against by the bills of rights in the State and national constitutions. The people struggled for hundreds of years to write those safeguards into the constitutions, and now it is proposed to lay the iron hand of capricious law upon childhood at a period when youth is not expected to know and understand the scope of law.

Such laws as these have been long since abandoned by enlightened nations. It would in my opinion be a step backward. Such laws belong to a time when personal liberty was universally disregarded, when householders were required to put upon their doors the names of those sheltered under their roofs, and when no one was secure against police interference.

The struggle for personal right has been a long and hard one, and the fruits of such a struggle should not be surrendered, except under some strong necessity. I cannot see that any such necessity exists in Michigan at this time. When such laws become a necessity kings will be needed to enforce them, for they have no proper place among a free people with free schools, and in an enlightened State.

Respectfully,

H. S. Pingree,  
Governor.

House joint resolution No. 6 (file No. 218), entitled

A joint resolution to authorize and instruct the Board of State Auditors to examine into, and if they deem it justifiable, to allow the claim of Alphonzo Button for injuries sustained by him from a premature discharge of a cannon while engaged in the regular performance of his duty as a member of the gun squad of the Curtenius Guard (an organized volunteer uniformed militia company, organized under the laws of the State of Michigan), at Mason, Michigan, on the 3d day of July, 1858;

In the passage of which the Senate has concurred by a majority vote of all the Senators elect, and by a vote of two-thirds of all the Senators elect has ordered the same to take immediate effect.

## GOVERNOR'S MESSAGE.

EXECUTIVE OFFICE,  
Lansing, May 6, 1897.

To the Senate and House of Representatives:

In my first message I referred in detail to the inequality and injustice of our present tax laws, so far as they affect quasi-public corporations. I called your attention to the demand which comes from many sources that corporate property should be taxed in the localities where it is situated, and recommended the creation of a Department of Taxes and Assessments, to be composed of a board to be appointed by the Governor, and to include some, if not all, of the officials who now have supervision of the corporations to be affected. I suggested that this board should determine the exact value of all corporate property not now taxed locally, and levy taxes thereon in the same proportion as private property now bears.

Urges leg-  
islature to  
action.

Your session is rapidly drawing to a close without any action upon these recommendations. I again call your attention to the existing exigency, and submit for your careful consideration the recommendations then made, in the hope that you may devise some means of equalizing, in a measure at least, the burdens of taxation. I desire

in this connection to say that I am not wedded to any particular system of taxation; any method that may be adopted to secure substantial equality will meet with my hearty approval.

Any  
method  
will meet  
with  
approval.

### Corporations Paying Specific Taxes.

At the present time we have several kinds of corporations paying specific as distinguished from general taxes:

River Improvement companies pay a tax of one per cent upon capital.

Corporations  
which pay  
specific as  
distinguished  
from general  
taxes.

Railroad companies pay a tax varying upon the amount of their gross earnings, from 2 to 4 per cent, and averaging about  $2\frac{1}{2}$  per cent.

Insurance companies in most cases pay a tax of two per cent upon gross earnings.

Plank road companies pay 5 per cent on net profit.

Telephone and telegraph companies pay the average rate upon the value of their properties, which average rate is determined by the Board of Review, consisting of the Auditor General, State Treasurer and the Commissioner of the State Land Office.

Freight, sleeping and palace car companies pay 2 per cent upon their gross receipts.

(Auditor General's Report for 1896, page 64.)

The operation of the laws under which these taxes are collected, seems to me very unsatisfactory. Under this system we collected, from express companies in the State in 1895, \$2,742.34. In the neighboring state of Indiana the property of these companies was assessed at \$1,330,676 for the year 1895. This did not include the real estate owned by them. Indiana has 1,336 less miles of railroad than Michigan. The business of express companies is largely dependent upon the railroads, so that it is safe to say that with our excess of mileage the business

gan and

done in this State must be at least equal to the business done in the state of Indiana. If the express companies in this State were assessed at the same amount as in Indiana their taxes would have been, in 1895, \$37,258.93 instead of \$2,742.34. This is computed at the average rate of taxation as fixed by the Board of Review for that year. Similar inequalities exist as to many of the other corporations named.

### Railroad Companies.

Taxation  
of railroad  
companies.

I desire at this time to call your special attention to the taxation of railroad companies, not because I wish to single out these corporations from others, but because there are bills now before you especially relating to them.

Total taxes  
of State  
for year  
1895.

Railroad corporations in this State are not bearing their proportion of taxes. I use the reports of the State officers for 1896, based upon taxation in this State for the year 1895. In that year the people of the State paid taxes upon a valuation of \$1,130,000,000.00. (Auditor General's Report for 1896, page 310.) This amount was reduced by the State Board of Equalization in 1896 to \$1,105,100,000.00. The valuation of the property of the State as equalized by the board of supervisors, in 1895, was \$818,086,160.00. The total taxes that year for State and municipal purposes is reported at \$20,633,571.04, or a fraction less than  $2\frac{1}{2}$  per cent. The Board of Review, acting under Section 1239 Howell's annotated statutes, fix the average rate of taxes, general, municipal and local, levied throughout the State during the previous year, from the records and files in the Auditor General's office, at 2 8-10 per cent. The total cost of railway property in the State, as returned by the companies and verified by the affidavits of their officers, was \$301,003,148.44 (Railroad Commissioner's Report, page lxxvi). The

railroad companies paid in taxes that year \$741,408.77. (Railroad Commissioner's Report for 1896, pages x and xi.) This tax amounted to a little less than  $\frac{1}{4}$  of 1 per cent upon the sworn valuations returned by the companies, something less than one-tenth of the percentage paid by the other taxpayers of the State. This enormous inequality will strike everyone as grossly unjust.

### Detroit Union Depot Co.

To descend to particulars and show the inequality of our present system of taxing railroad properties, I will use the Detroit Union Railroad Depot and Station Company for the purpose of illustration. To show the property possessed by this company I quote from its report as published in the Railroad Commissioner's Report, page 501:

Of elevators and belongings.....	303,595 00	
Of all other property.....	584,120 00

The taxes paid were \$3,739.61, and amounted to less than one-sixth of one per cent, which is less than one-fifteenth of the average rate per cent paid in taxes by individual taxpayers of the State.

### Injustice of Specific Taxation.

The system of specific taxes applied to only a part of the property of the State, cannot be continued for any length of time without producing great injustice. It will be readily seen that if all the property of the State was

justice to

to be taxed specifically, and a fixed rate determined upon in advance, it would be impossible to meet any of the emergencies which from time to time arise. If, for instance, in 1846 the legislature had fixed three-fourths of one per cent as the taxes which would be paid by all taxpayers, as it did fix the taxes to be paid by the chartered railroad companies, there would have been no way to provide for the increase of taxes which has since occurred. Under the special charters specific taxes were placed, in 1846, at three-fourths of one per cent upon the capital stock paid in, and such moneys as were realized from loans and used in the construction of railroads. This rate of taxation was made to commence in 1851. It will be noticed that while this rate was fixed as a specific tax it was fixed upon the valuation of the property, and not upon earnings. At that time we had no great University; no asylums worth speaking of; no Soldiers' Home; no Normal School; no Agricultural College; no schools for the deaf or for the blind; no industrial homes; no mining school; no great prisons; no fish commission; no State Board of Health; no State Weather Service; no extensive militia; no dairy and food inspection, and comparatively inexpensive schoolhouses. This was at a time, too, when the population along the line of these roads was very much less than at present, and when the commerce of the State was comparatively undeveloped. These charters remained undisturbed from 1846 until 1893, when the charter of the Michigan Central Railroad, so far as taxation was concerned, was repealed. They still remain in force as to the other companies. The intervening period was one of wonderful development in this State, and at every session of the legislature the people have been called upon to make extraordinary appropriations for the building up of State institutions. The period also

embraces the years of war between 1861 and 1865, during which the burdens upon the taxpayers were greatly increased and enormous sacrifices had to be made.

During this period the percentage of taxes on an ordinary taxpayer increased with great rapidity. In 1840 the rate was only two mills on the dollar for State purposes. In 1855, when the first Republican legislature convened, the rate of taxation was less than one-third of a mill on the dollar, and only about six cents per capita. In 1865, at the end of the war, the taxes for State purposes were less than four mills on the dollar, and only 57 cents per capita. In 1871, taxes for State purposes were a little more than one and two-tenths mills on the dollar and only 33 cents per capita. In 1873, taxes for State purposes were less than one and six-tenths mills. In 1895 our taxes had increased to nearly two and seven-tenths mills for State purposes, and to \$1.34 per capita. (Auditor General's Report for 1896, pages 309 and 310.)

taxes paid  
by individ-  
uals from  
1840 to 1895.

During the same period the proportion of the total taxes paid in the State, as far as railroad companies are concerned, decreased. In 1855, the railroad companies in the State paid 72 per cent of all the taxes levied for State purposes. In 1870, the percentage had dropped to 34.9-10 per cent. In 1895, it had dropped to 21.7-10 per cent, notwithstanding the conceded contention of the railroad companies that their improvements and extensions have more than kept pace with the increase of property and population.

of taxes by  
railroad  
companies  
from 1840  
to 1895.

This percentage refers to the State tax alone. The other taxpayers of the State were called upon to meet similar increases in taxation for local purposes from which the railroad companies in the State have been entirely free.

Individ-  
uals taxed  
for local  
purposes  
also.

### History of Railroad Taxation.

The history of railroad taxation in this State is very interesting. Under the special charter of 1846, the roads were required to pay, after 1851, an annual tax of three-fourths of one per cent upon their capital stock paid in, and upon all loans made by the company for the purpose of construction. Upon this basis the taxes upon the railroads of Michigan at the present time would be \$2,267,523.61 instead of \$741,408.77.

Railroad taxes in 1855 one per cent on capital stock paid in. What State would receive if this law had been continued.

Under the law of 1855, passed by the first Republican legislature of the State of Michigan, the taxes on railroad companies were made one per cent upon the capital stock paid in. Under this act, if it had been left undisturbed and applied to all railroads, we should be receiving \$3,010,031.49, instead of \$741,408.77. Under the act of 1869, we should be receiving in addition to this, one per cent upon money realized from loans, municipal aid and other sources used in the construction of railroads.

Every change in the system of taxation from 1869 to the present time has resulted in decreasing the proportion of taxes paid by railroads. In the meantime the burden of taxation on others, as already shown, has enormously increased. The legislature of 1846, although supposed to have been compelled to submit to a hard bargain, fixed the rate of taxation for that time upon a comparatively fair basis. The legislature of 1855, in fixing a tax of one per cent upon the value of the railroad property, sought to make the railroad companies pay their just proportion of the public burden. The legislature of 1869 saw the justice of adding to the capital stock of the companies the value of property received from towns through which the railroads passed, and the improvements made from borrowed money. The system of a tax on earnings was not

Every change in railroad taxation has been in favor of railroads.

adopted until 1871. At that time, the railroad companies were paying nearly 35 per cent of the whole State tax, not including taxes for municipal purposes. The effect of the legislation was to decrease the percentage paid by railroads in two years to less than 18 per cent. If the railroads paid the same percentage of State taxes in 1895 as they did in 1855, they would now be paying \$2,751,977.94 instead of \$741,408.77.

Even the change made in the Michigan Central charter in 1893, by which people were led to believe that the Michigan Central Railroad Company, in coming under the general law as to taxation, had made a concession favorable to the other taxpayers, has operated to decrease the burdens of that company. The report of the Michigan Central Railroad Company, printed in the Railroad Commissioner's Report for 1896, at page 351, shows the cost of the 221 miles of that road in Michigan to be \$25,462,632.13. Taxes computed upon this sum under the old charter at three-quarters of one per cent would amount to \$190,969.74. The taxes paid by the company in 1895, under the new act, were \$145,515.01, making the State a loser by the change of \$45,454.73. This is the loss for a single year. The repeal of the charter was made to cover the taxes of 1892, so that the State has already lost by the change made in 1893 more than two hundred thousand dollars, in the taxes paid by this company alone.

Taxes paid by Michigan Central; State is a loser by the change made in 1893.

I am aware that it is claimed by the railroad companies that their business is so depressed and that Michigan affords such a poor field for their operations that they cannot afford to contribute their share towards the necessary expenses of the State.

Railroad companies' claim of poor business.

### **Michigan First in Galaxy of States.**

I regard it as a slander upon the Commonwealth to say that Michigan is not as favorably situated for railroad operations as any of her sister states. She has been considered unusually rich in resources, and resources of that character which make business for railroads. Michigan is first in the production of lumber, first in the production of salt, first in the production of copper, first in the production of iron. She is far above the average in the production of wheat, corn, potatoes, wool and fruit. She has an industrious and thrifty population. She lies in the path of through commerce and certainly enjoys her full share of it. Her manufactures, as compared with the adjoining state of Indiana, to which comparisons have hereinbefore been made, were in 1890 as follows: Michigan, \$277,896,706; Indiana, \$226,825,082. It will be seen that the manufactured products of Michigan exceeded those of Indiana by more than \$50,000,000, although the population of Indiana at that time was slightly in excess of the population of Michigan.

### **Increase of Railroad Earnings.**

It is also argued that the railroad earnings have been falling off so rapidly in late years that it would be unjust at this time to increase railroad taxation. A glance at the statement published by the Railroad Commissioner in his report for 1896, at page lxxviii, will convince anyone that there is no truth in this claim. It will be conceded by everyone that in 1891 and 1892 the country was very prosperous. In 1891, the railroads located entirely within and partly within and partly without this State, reported their earnings from

It will be noticed by reference to this table that the earnings of these roads for 1895 were more than ten millions more than in 1894; more than thirty-two millions more than in 1892, and nearly fifty millions more than in 1891.

To come down again from the general statement affecting all the railroads in the State to a particular instance, let us use the Michigan Central Railroad Company as an illustration. According to its report as published by the Railroad Commissioner in 1896, at page 350,

\*Its total earnings from operation were... \$13,651,420 61  
Its total expenses including taxes were... 10,183,231 31

\* An annual meeting of the stockholders of the Michigan Central Railroad Company was held in Detroit on Thursday, May 6, and attended by Cornelius Vanderbilt, William K. Vanderbilt, F. W. Vanderbilt, E. D. Worcester, H. M. Trombly and Dr. Seward Webb.

At this meeting the annual report of the railroad was submitted which shows that the gross earnings of the company for the year 1896 was \$13,821,514 44, which is an increase of gross earnings for the year 1896 of \$170,193.83 over the year 1895.

in railway  
earnings in  
four years.

It would have taken \$100,000,000 in United States bonds, bearing three and one-half per cent interest, to earn about the same amount.

It would have taken \$100,000,000 worth of the best real estate in our cities, after paying the taxes imposed for State and municipal purposes, to earn the amount.

I leave it to the legislature to say how much would have to be invested in farm property to net this amount.

I do not overlook the claim that many of the railroad corporations of the State are not paying dividends; that some of them are in a bankrupt condition and unable to pay interest on the bonds which they have issued. If all this were true, it would afford no ground for exemption from taxation. There is a great deal of unoccupied and unrented property in cities which brings no revenue whatever to its owners, but is still compelled to pay its proportion of taxes. Many of our banks have been compelled to reduce their capital in order to charge off poor loans and make their stock worth its face value. They are still compelled to pay their taxes. There are many farmers who receive no return from their investments in

ation.

lands, and sometimes receive scarcely anything for the labor they perform upon them. They are still required to pay their taxes. To exempt any property from taxation is to shift the burden to other property; there is no reason why these great corporations, which are notoriously able to and do pay extravagant salaries to their officers, as well as other extravagant expenses, should not bear their share of the public burdens.

### Railroads Exempt from Taxation.

So far, I have dealt with those railroads in the State which contribute something towards the public burdens. There are, however, a number of railroads which pay nothing. In the report of the Railroad Commissioner, page ix, I find the following table.

The following roads are located north of parallel 44 of latitude, and claim exemption under act. No. 174, session laws of 1891:

Name.	Date commenced to be built.	Date commenced to be operated.	Miles.
Alpena & Nor. Div. of Detroit and Mackinaw -----	May, 1893---	Nov. 18, '93---	84.70
Boyne City and Southeastern.	Apr. 26, '93---	Aug. 28, '93---	14.00
Chicago and North Michigan.	May 15, '91---	June 26, '92---	92.62
C., M. & St. P., (Channing Div.)	Feb., 1892---	Jan. 1, '93---	47.05
Manistee and Northeastern-----	Oct. 1, '91---	July 1, '92---	24.00
Wisconsin and Michigan-----	Apr. 4, '94---	Jan. 1, '95---	54.10

This table shows a total of more than 316 miles. The sworn reports filed with the Commissioner of Railroads show that these roads are worth more than \$15,000,000. Some of them belong to systems of roads which paid last year as high as 7 per cent in dividends.

On what principle can these properties be exempted from taxation?

Our constitution provides: "The legislature shall provide an uniform rule of taxation, except on property paying specific taxes, and taxes shall be levied on such property as shall be prescribed by law." (Art. 14, Sec. 11.)

How can we call that an uniform rule of taxation which exempts some property entirely from taxation and shifts the taxes which it should pay to the shoulders of others? It is mere robbery under the name of legislation.

Rule of taxation which exempts some property and taxes other is legislative robbery.

### **Demands Upon the State.**

We are called upon this year, as our predecessors have for many years gone by, to make extraordinary appropriations for our State institutions. It is absolutely necessary that we make these appropriations. The ordinary taxpayers of the State are compelled to meet them.

The railroad companies will make a profit out of every appropriation made, while they contribute a mere pittance in proportion to the general taxpayer. They will make a profit upon every student who is carried to our normal school or university; upon every prisoner who is taken to one of our penitentiaries; upon every insane person who is transported to an asylum; upon every pound of freight that is carried to any of the State institutions for their use. On what principle can it be said that they should not bear their proportionate share of the cost of maintaining these establishments?

We are also called upon at this session, as the State has been called upon before, to provide for those who have suffered by fires and famine. The railroad companies will make a profit on every pound of freight sent to the relief of these unfortunate people, while paying practically nothing towards the appropriations made for

Railroads

lature.

them. From the beginning, these great corporations have practically evaded their duties to the State. In the war for the Union the burden of every other taxpayer was largely increased. The railroad companies made a profit upon every soldier who was carried to the front, and upon the body of every dead soldier who was brought home to be buried. At the same time their taxes remained stationary. No other interest in the State is so likely to need the protection of the National Guard. If our soldiers are called out to protect railroad property, they will insist upon fare for their transportation, and at the same time pay practically nothing towards the expenses incurred.

### **Values, not Earnings, Should be Assessed.**

Honest  
way is to  
place all  
property  
on an equal  
footing.

There is but one rule consistent with honesty; that rule is to place all property upon the same footing; to make every one pay his share, and to ask no one to pay more than his share. No one should ask the railroads to do more than they insist upon others doing. No one should be satisfied with anything less. To increase the present tax by an insignificant amount, would be merely trifling with the rights of the people. What is demanded is a substantial and bona fide effort to equalize taxes, and make every one pay his share.

It is not my intention to recommend such a change in our present system as will injuriously affect the primary school fund to which specific taxes are now devoted. I trust you may be able to frame such a law as will impose upon railroads their just proportion of taxes, and at the same time so distribute the amount raised that what is now paid to the primary school fund shall be increased rather than diminished. I should be glad to see at least

one million of dollars, or even a greater sum, of the taxes imposed, devoted to this purpose. I fully realize that the State has made great sacrifices to establish railroads; that it has given away millions of acres of land; that many of the municipalities have devoted large sums to encourage railroads to be built. It is only just that those parts of the State which have no depots or other valuable railroad property, should receive something in return for the sacrifices which they, as well as others, have been compelled to make. The return cannot be made in any better way than by a contribution to the primary school fund, in which all the people of the State are intensely interested.

It is assumed by many that in advocating a change in the manner of assessing railroad property, so as to tax it upon value instead of upon earnings, a new departure is proposed. This is untrue. From 1846 to 1893 the chartered roads, without exception, paid a specific tax upon the value of their properties. Most of them do so still. From 1855 until 1871 the railroads organized under the general railroad laws of the State paid a specific tax upon their capital stock paid in. The system of taxing earnings began in 1871. It has worked disastrously for the State. It is objectionable in many ways. It opens a door for fraud against which the State has no protection. The State is practically compelled to accept the reports made to it by the railroad companies.

Change in  
method of  
railroad  
taxation  
not a new  
departure

### **Michigan Discriminated Against.**

Many of our great railroad lines cross our own State and into the adjoining states of Ohio, Indiana, Wisconsin and Minnesota. In Ohio and Indiana there is a tax upon the value of the property; in Michigan the tax is upon earnings. The temptation is always held out to these

railways to so manipulate their accounts that their earnings shall appear to be as small as possible in Michigan, and the value of their property as low as possible in Indiana and Ohio. We have no check upon their accounts from which to determine the correctness of their returns. So long as the adjoining states have a different system of taxation, the companies have the power not only to defraud our State, but the others in which their lines run.

Two methods of assessment gives opportunity for fraud.

I do not intend to make any charge against the railway companies having such lines. There has been no investigation which would warrant me in asserting that any fraud has been committed upon the State. I only intend to point out the ease with which such fraud may be committed.

Michigan not receiving as much as other states.

One thing is certain, that Michigan is not receiving from railroad companies any such return as is received by other states no more favorably situated. We get in Michigan less than three-quarters of a million of dollars. Our adjoining sister state of Indiana gets more than two and a quarter millions, although we have 1,336 miles of railroad in Michigan in excess of the mileage in Indiana, and although our manufactures and commerce are greater than that of Indiana.

Importance of the subject.

Taxation in Michigan has become a question of paramount importance. It amounts in many cases to confiscation. It demands the earnest thought and honest action of those entrusted by the people with the management of their affairs.

Trusting that it may receive at your hands the consideration which it deserves, and that the recommendations made may be promptly acted upon, I submit these views to you.

Very respectfully,

H. S. PINGREE,  
Governor.

The Speaker also announced the following:

EXECUTIVE OFFICE.  
Lansing, May 10, 1897.

To the Honorable, the House of Representatives:

I return herewith without my approval House bills Nos. 268, 416 and 3, consolidated as file 334, and entitled "An act to prohibit the selling, giving or furnishing of tobacco or cigarettes in any of their forms to minors, or the use of tobacco or cigarettes in any of their forms by minors, and providing penalties therefor.

The first section of this bill makes it unlawful to sell, give or furnish to minors under the age of seventeen years, cigarettes, cigarette paper, cigarette wrappers, cigarette materials in any form whatsoever, or any substitute for the same, or any cigar, cheroot, chewing or smoking tobacco, or tobacco in any form whatsoever. Section 2 makes it a misdemeanor in the person so offending, and provides a penalty. These sections are not unlike our present law, which provides "that it shall not be lawful for any person by himself, his clerk or agent, to sell, give or furnish any cigar, cigarette, cheroot, chewing or smoking tobacco, or tobacco in any form whatsoever, to any minor under seventeen years

of age, unless upon the written order of the parent or guardian of said minor." Howell's statutes, Sec. 9122c. Sec. 9122d makes any one guilty of violating this statute punishable by a fine of not less than five dollars nor more than fifty dollars, or by imprisonment in the county jail for a term of not less than ten days nor more than thirty days, or by both such fine and imprisonment in the discretion of the court.

So far as the first two sections of the bill are concerned, the old law seems to me to be more carefully guarded in its provisions than the present bill. Under this bill children would not be permitted even on the written order of their parents or guardians to be used as messengers to buy tobacco in any form. I am in full sympathy with the object of this law in so far as it affects those of full age who throw any temptation of the kind covered by the bill in the way of children.

Section 3 of this bill, however, makes the minor to whom any such goods are sold or given, guilty of a misdemeanor, and provides for a fine of five dollars for the first offense, a fine of not less than ten nor more than twenty-five dollars for the second offense, and a fine of not less than thirty nor more than fifty dollars for the third offense, and imprisonment in the county jail or in the Industrial Home for Boys for the fourth offense. This section applies to boys under seventeen years of age. I have already expressed my opinion as to the arrest and imprisonment of children, and the probable effects of such arrest and imprisonment upon their future lives. I believe it to be the duty of the State to guard them in every way possible against temptation. The sale of cigarettes or any other article by which children are tempted to injure themselves, should as far as possible, be prohibited. The remedy for the evils aimed at, is the punishment of those of full age who are concerned in the transaction, and who make money by it, regardless of the injury that it may do to others, instead of the arrest of those who are so young that they do not appreciate the nature of crime, and who may be turned into criminals by forced association with them.

The law as it stands and the law as proposed strikes at an evil. I fully appreciate the good intentions underlying this bill. The remedy proposed, however, seems to me to be an unwise one. Any child up to seventeen may be arrested and fined if found smoking or buying a cigarette, or tobacco in any form, or even cigarette paper. He may be branded as a criminal. His name goes upon the books of the police department as a law breaker. While the matter is under investigation, he may be imprisoned, and forced into association with criminals. The fine in the first instance is small, but still large enough to make it impossible for the child to pay it. It must be paid by the parents. The only effect upon the child is to bring him into public disgrace. The same may be said as to the penalty provided for the second and third offense. The effect upon the child is to increase his police record, to enlarge his experience among criminals, and to destroy his self respect. For the fourth offense, the child may be imprisoned in the county jail or sent to the Industrial Home, presumably to remain until he is twenty-one. When this is done, all hope for the boy's future life is ended. His associations for the future are to be with those who are branded as criminals, and many of whom are criminals in fact. A graduate from the Industrial Home starts in life with an awful load upon him. Where he is of an extraordinary character he may live down his shame, but where he is such a character, he may
